

## Product Highlights

### Comprehensive Management Solution

Advanced features such as WAN failover, load balancing and an integrated firewall make this a reliable, secure, and flexible way to manage your network

### Complete VPN Features

With a fully featured VPN as well as IPSec hub-and-spoke technology, secure communications between mobile employees and offices can be configured easily

### Web Authentication Capabilities

Captive Portal allows employees and guest users to be easily authenticated and authorized by accessing customized landing pages

## DSR Series

# Unified Services Routers

## Features

### High-Performance VPN

- Protocols
  - IPSec, PPTP/L2TP, GRE, SSL, OpenVPN
- VPN Tunnels
  - DES, 3DES, AES, Blowfish, Twofish, CAST128
  - Hub and Spoke

### Enhanced Network Service

- IPv6
- IEEE 802.11q VLAN
- Multiple SSIDs<sup>1</sup>
- Port Monitoring/Bandwidth Control
- IGMP Proxy, IGMP Snooping
- Web Content Filtering
- Web Authentication Capabilities
- Application Control<sup>7</sup>

### Wireless Access and Security

- IEEE 802.11 a<sup>2</sup>/b/g/n/ac<sup>2</sup>
- IEEE 802.1x RADIUS Authentication with EAP-TLS, EAP-TLLS, EAP-PEAP
- 802.11 128-bit AES wireless encryption

### Fault Tolerance

- WAN Traffic Failover and Outbound Load Balancing

The D-Link DSR Series Unified Services Routers provide secure, high-performance networking solutions to address the growing needs of small and medium-sized businesses. With integrated high-speed wireless<sup>1</sup> technology, the DSR series routers offer comparable performance to wired networks, but with fewer limitations. Next generation wireless performance is available on the DSR-500AC and DSR-1000AC, which introduces 802.11ac support to the family. Available on the 5 GHz band, the combination of wider radio frequency bandwidths take data rates available to clients supporting the wireless AC standard to the next level.

## Comprehensive Management Capabilities

The DSR-500/500AC and DSR-1000/1000AC Unified Services Routers include dual WAN Gigabit Ethernet ports to provide high availability for your WAN or Internet connections. Traffic can be load-balanced across the links with Outbound Load Balancing, increasing the performance and availability of business applications. The secondary WAN port can also be used to create a DMZ, isolating servers from your LAN. The DSR series supports mobile broadband networks via an extendable USB modem<sup>3</sup>, such as 3G or 4G dongles. Traffic load balancing can be performed on the mobile data connections, providing an additional layer of redundancy for critical or backup applications.

## Web Authentication Capabilities

Captive Portal allows employees and guest users to be easily authenticated and authorized by accessing a customized landing page. Users can be authenticated by a local database, RADIUS, LDAP, Microsoft Windows Active Directory, NT Domain or POP3 server. A maximum of four servers can be configured at any one time.

### Complete and Robust VPN Features

A fully featured virtual private network (VPN) provides your mobile workers and branch offices with a secure link to your network. The DSR series routers are capable of Secure Sockets Layer (SSL) VPN tunnels, as well as Generic Routing Encapsulation (GRE) tunnels, empowering your mobile users by providing remote access to a central corporate database. Site-to-site VPN tunnels use IP Security (IPSec) Protocol, Point-to-Point Tunneling Protocol (PPTP), or Layer 2 Tunneling Protocol (L2TP) to facilitate branch office connectivity through encrypted virtual links. OpenVPN allows mobile users to connect to the intranet via encrypted links with their PC, laptops or mobile devices.

### Web Content Filtering

The DSR Series also provides a web content filtering feature to help administrators monitor, manage and control employees' Internet usage. Static web content filtering helps to remove malicious objects such as Java applets, ActiveX, and cookies, or to block URLs by keyword. Dynamic web content filtering, which requires a license subscription, allows administrators to filter content from a list of categories. Multiple global index servers, with millions of URLs and real-time website data, enhance performance and maximize service availability.

### Application Control

Application control enhances security by only allowing certain types of network traffic for predefined applications. The DSR Series uses application control to help accurately shape network traffic by either giving priority or applying control policies to effectively manage network utilization. Using packet inspection and a database of application signatures based on the application's network usage patterns, the DSR Series gives complete control over the content that is delivered to end users.

### Web Content Filtering for HTTP/HTTPs

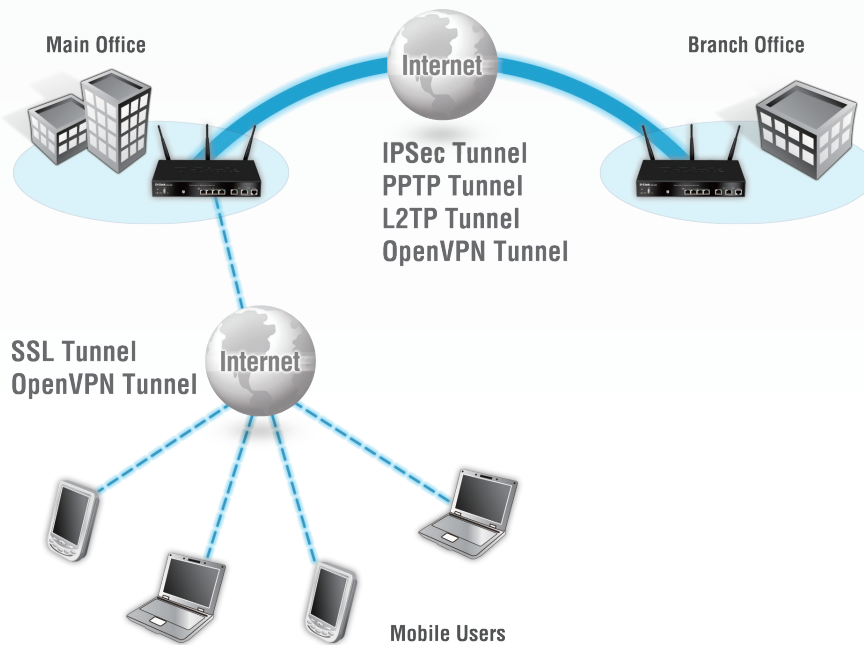

**USB 2.0 Extension**

Supports one (DSR-150/150N/250/250N/500/500AC) or two (DSR-1000/1000AC) USB 2.0 devices to extend functionality.

**Secure VPN Network Implementation**

**Dual WAN for Redundant Internet**

Technical Specifications				
General	DSR-150/150N	DSR-250/250N	DSR-500/500AC	DSR-1000/1000AC
Hardware Version	DSR-150 A4 DSR-150N C1	DSR-250 A4 DSR-250N B1 DSR-250/250N C1	DSR-500 B1 DSR-500AC A1	DSR-1000 B1 DSR-1000AC A1
Ethernet Interface	<ul style="list-style-type: none"> <li>1 x 10/100 Mbps WAN port</li> <li>7 x 10/100 Mbps LAN ports</li> <li>1 x 10/100 Mbps configurable port</li> </ul>	<ul style="list-style-type: none"> <li>1 x 10/100/1000 Mbps WAN port</li> <li>8 x 10/100/1000 Mbps LAN ports</li> <li>1 x 10/100/1000 Mbps configurable port</li> </ul>	<ul style="list-style-type: none"> <li>2 x 10/100/1000 Mbps WAN ports</li> <li>4 x 10/100/1000 Mbps LAN ports</li> </ul>	<ul style="list-style-type: none"> <li>2 x 10/100/1000 Mbps WAN ports</li> <li>4 x 10/100/1000 Mbps LAN ports</li> </ul>

MTBF	240,000 hours	250,000 hours	360,000 hours	

<sup>1</sup> DSR-150N/250N/500AC/1000AC only.

<sup>2</sup> DSR-500AC/1000AC only.

<sup>3</sup> The following portable modem are supported: DWM-152 A1, DWM-156 A1/A3/A5/A6/A7/A8, DWM-157 A1/B1/C1/D1, DWM-158 D1/E1 and DWP-156 B1 and DWP-157 B1, DWM-221/222, HUAWEI: E1550, E173, EC306 and E303.

<sup>4</sup> Firewall throughput is measured using UDP traffic with a 1,518 bytes packet size, adhering to RFC2544.

<sup>5</sup> Actual performance may vary depending on network conditions and activated services.

<sup>6</sup> VPN throughput is measured using UDP traffic with the packet size 1420 bytes and encryption method 3DES plus SHA-1, adhering to PFC2544.

<sup>7</sup> Available with future firmware upgrade, only supported by DSR-150/150N/250/250 C1 and DSR-500/500AC/1000/1000AC.
