PRODUCT SETUP

HARDWARE SETUP

Please follow the diagram below to connect the KVM switch to your workstation computers. Speakers are optional.

For additional information regarding setup and operation please see the User Manual on the Installation CD included with your KVM switch.

Speakers   Monitor   Keyboard   Mouse   Remote

Note:
This KVM Switch will not detect whether a computer is on or off if the "Power On" function is set in the BIOS. If you switch to a computer that is turned off, nothing will be displayed on the monitor.

SWITCH OPERATION

Remote Control Switching
Push the remote control button to switch between computers.
The green and orange LEDs indicate the selected PC.

Hot key Switching (for Microsoft Windows® PCs)
Press the Scroll Lock key two times to switch between PCs, including audio.
Press the Caps Lock key two times to switch between PCs but maintain the audio feed of the original computer.

TROUBLESHOOTING

SETUP AND CONFIGURATION PROBLEMS

1. **WHEN TURNING THE COMPUTER ON, THE KEYBOARD IS NOT DETECTED, OR A KEYBOARD / MOUSE ERROR MESSAGE IS DISPLAYED.**
   If the computer's BIOS does not support USB boot-up, the system may be unable to detect the mouse and keyboard during startup. Please ensure that your PC BIOS supports USB boot-up, and upgrade your PC's firmware if necessary.

2. **THE COMPUTER'S BIOS IS CORRECTLY CONFIGURED BUT THE COMPUTER IS STILL UNABLE TO DETECT THE MOUSE AND KEYBOARD.**
   Be sure to directly connect the USB KVM switch to USB port on the PC's motherboard rather than through a port on a PCI card, Card Bus, or USB Hub.

3. **WHEN SWITCHING TO PC2, THE COMPUTER STILL DISPLAYS PC1.**
   The KVM switch may not function correctly while a computer is powered off or still booting up. Ensure that the second PC is powered on and use the hot key or remote control button to switch between computers.

4. **HOW DO I SET A HOT KEY IN MAC 10.6?**
   Please CTRL + click or right-click on the green taskbar icon and click on Setting to open the settings menu to set a hotkey.
