# Product Overview

## Package Contents

- D-Link DSM-600 Network Storage Enclosure
- Power Adapter (12V DC, 3A)
- Cat5 Ethernet Cable
- Rubber Feet (4)
- CD-ROM with Software and Manual
- Quick Installation Guide
- Mounting Screw

**Note:** Using a power supply with a different voltage rating than the one included with the DSM-600 will cause damage and void the warranty for this product.

## System Requirements

- Windows® XP/2000
- Internet Explorer Version 6.0 or Netscape Navigator Version 7.0 and Above
- An internal 3.5" PATA/IDE hard drive and/or USB Hard Drive
- An available Ethernet port on the network\*

\* It is required that an Ethernet cable is used during initial setup.

# Introduction

The D-Link DSM-600 Network Storage Enclosure shares your documents, photos, music, and videos across the network and on the Internet (via FTP server) so family members, friends, or employees can access them. This enclosure, which can hold one 3.5" IDE hard drive of any capacity or can allow up to two USB 2.0 hard drives to attach\*, creates a central network point for backing up valuable files.

The DSM-600 shares files over the Internet via the built-in FTP server. Users can be created and assigned to folders with either read or read/write permissions. In addition, the DSM-600 can be used to stream photos, music, and videos to UPnP AV compatible network media players.

The included CD contains D-Link's Easy Search Utility. This utility allows you to locate the DSM-600 on the network and map drives to your computer. Backup software is also included on the CD. This software allows you to backup your files from a computer to the DSM-600 manually or by a schedule. Regular backups are a great way to safeguard against unfortunate accidents that may result in the loss of important files.

Combining ease of use with practical features, the DSM-600 is an organized solution for any network. Free up disk space on computers and centralize data on your network with the DSM-600 Network Storage Enclosure!

\*Hard drives not included.

# Features

- **Connect an Internal IDE drive and/or USB 2.0 hard drives on the Network** - Add extra storage space to your network! Connect a 3.5" PATA/IDE hard drive and up to two stand-alone USB 1.1 or 2.0 hard drives or flash drives to the DSM-600 and easily have access to all stored files.
- **Built-in FTP Server** - The DSM-600 can be configured so that your internal/USB drives are accessible over the Internet, making it convenient to access your files, even when you're away.
- **Safely Add and Remove USB Drives** - The DSM-600 does not require you to reboot the system when adding USB drives to the network, thus eliminating downtime. You can safely remove the USB drives using the **Dismount** button on the back of the DSM-600.
- **Plug & Play** - Through plug and play setup, installing the DSM-600 into your network has never been easier. Simply connect the DSM-600 to an Ethernet port on your network router or switch, insert an internal IDE drive, plug in USB hard drives or flash drives (optional), and configure additional setup options using the Web-based configuration utility.
- **Web-based Configuration Utility** - Additional setup options can be configured using the built-in Web-based configuration utility including firmware upgrade, user creation, folder assignment, scheduled downloads, and DHCP/static network settings.
- **Backup Function** - You can schedule the DSM-600 to automatically create full or incremental backups of important information from the network.

# Hardware Overview

## Front Panel

## Rear Panel

### Reset Button

Pressing the reset button for 10 seconds with a paper clip will restore the unit to the original factory default settings. The button is inside the hole to prevent an accidental reset.

### Power Receptor

Receptor for the supplied power adapter.

### Dismount Button

Press to safely remove USB drives from the DSM-600.

### USB 2.0 Ports

Use these ports to connect USB 2.0 drives. USB 1.1 drives may also be connected but will be limited to USB 1.1 speed.

### LAN Port

Connects to your Ethernet network. The LAN port supports Auto MDI/MDI-X, allowing you to connect a straight-through or crossover cable.

# Hardware Installation

## Internal Hard Drive

**WARNING:** Disconnect the power cord before inserting or removing the internal hard disk drive.

- A.** Unscrew the two screws on the back panel of the DSM-600 to remove the cover.

- B.** Connect the IDE cable to the IDE cable connector on your hard drive.

**Note:** Make sure the jumper setting on your hard drive is set to *Master* or *Cable Select*.

- C.** Connect the power cable to the power connector on your hard drive.

**D.** While facing the back of the DSM-600, insert the right side of the hard drive into the case. Once in place, snap down the left side.

**E.** Use the mounting screw to secure the hard drive to the DSM-600. Replace the cover and screw the two screws on the back panel of the DSM-600.

**F.** Connect an Ethernet cable to the Ethernet jack located on the back of the DSM-600 for initial setup.

**Note:** It is required that an Ethernet cable is used during initial setup.

**G.** Connect the power adapter to the power receptor on the back panel. Then plug the other end of the power adapter into a wall outlet or power strip. After pressing the power button, the power LED will blink as the device is starting. The power LED will become solid when the DSM-600 is ready for use.

**Note:** When you first power on and access the web-based configuration, the DSM-600 will offer to format your hard drive if it is unformatted. This process may take several minutes depending on the size of your hard drive. During this process, the power LED will blink. Do not power the unit off during this process. Once the power LED is solid, you may then access the web-based configuration of the DSM-600.

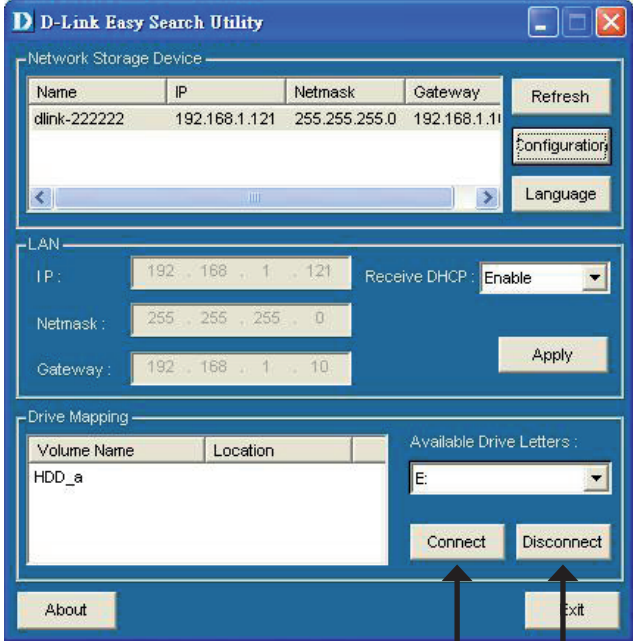

# Mapping a Drive

You can use the D-Link Easy Search Utility to map drives to your computer.

Insert the DSM-600 CD into your CD-ROM drive.

Click **Easy Search Utility**

The screenshot shows the D-Link Easy Search Utility window. It has four main sections: Network Storage Device, LAN, Drive Mapping, and About. The Network Storage Device section contains a table with columns for Name, IP, Netmask, and Gateway. The LAN section has input fields for IP, Netmask, and Gateway, along with a Receive DHCP dropdown and an Apply button. The Drive Mapping section has a table with columns for Volume Name and Location, an Available Drive Letters dropdown, and Connect and Disconnect buttons. The About button is at the bottom left.

Highlight an available DSM-600

Available shares will be displayed under **Drive Mapping**. Highlight the share you want to map.

Select an available drive letter from the drop-down menu and click **Connect**.

Click **Disconnect** to remove the selected mapped drive.

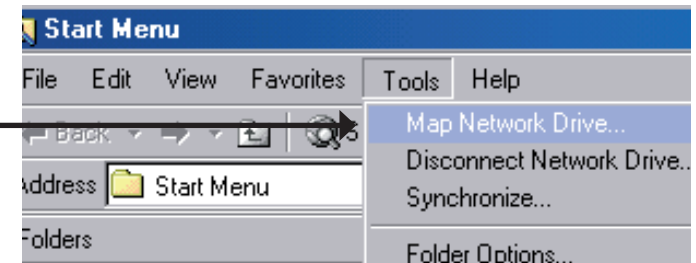

Once connected, your mapped drive(s) will appear in **My Computer**. From your desktop, double-click the **My Computer** icon and then double-click your mapped drive to access files and folders.

As an alternate method, you can access the DSM-600's internal/USB drive(s) by mapping the shared folders as drives in Windows. Please see the following instructions for mapping a drive so that it is accessible from the My Computer screen.

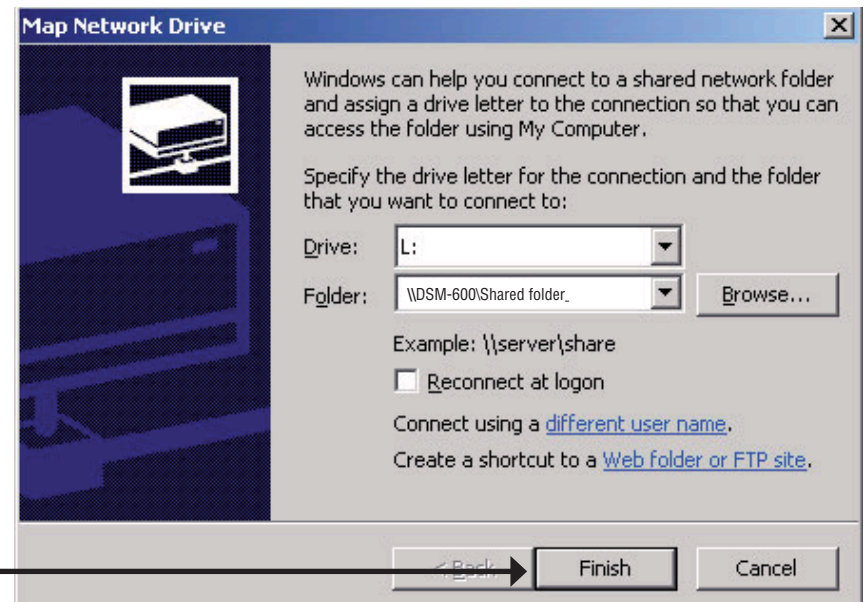

Right-click **Start** and click **Explore**

Click **Tools** and click **Map Network Drive**

Select an available drive letter and click **Browse** to locate your shared DSM-600 folder.

You will find the DSM-600 shared folder under the **Workgroup Name** that you entered into the Setup Wizard or in the Home > LAN screen of the Configuration Utility.

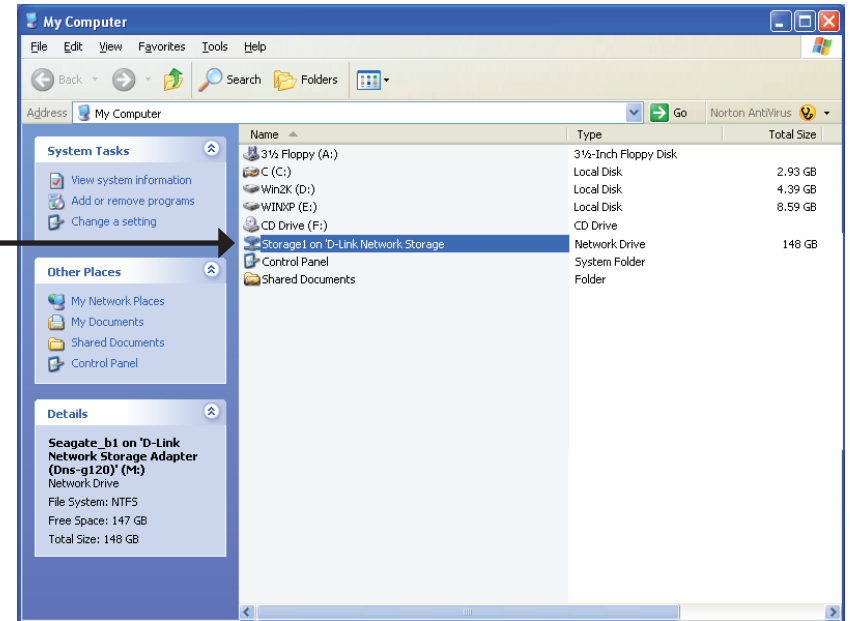

Click **Finish**

Once connected, all mapped drives will appear in My Computer.

Double-click the **My Computer** icon on your desktop

Double-click on the mapped drive to access files and folders.

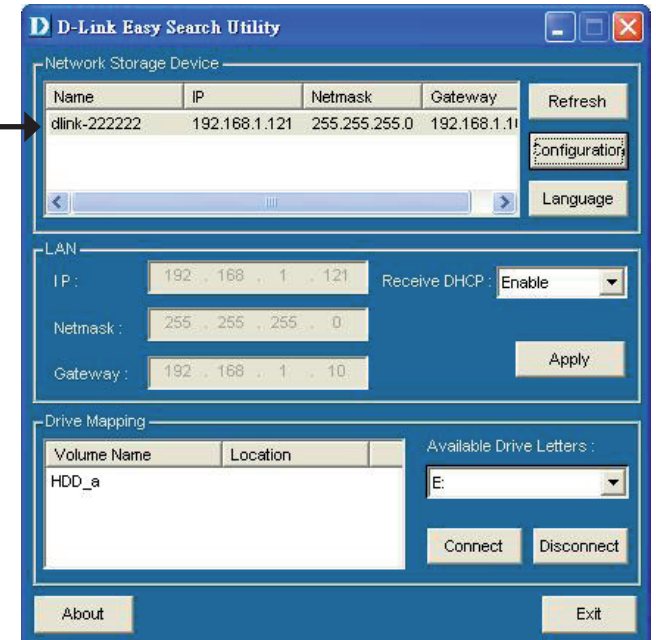

# Using the Configuration Utility

Insert the DSM-600 CD into your CD-ROM drive.

Click **Easy Search Utility**

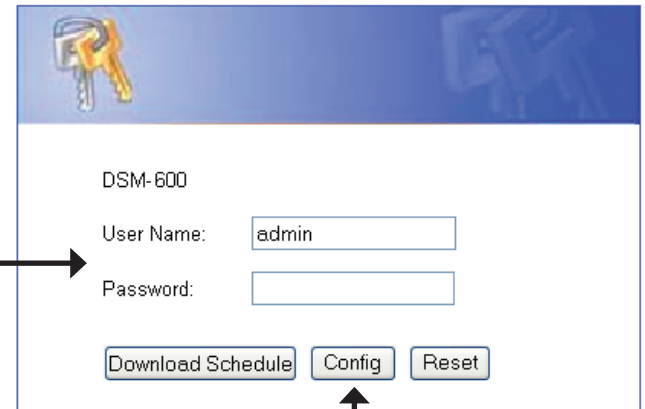

Highlight an available DSM-600 and click **Configuration** to access the web-based utility.

The logon screen will appear.

Type **admin** for the username and leave the password field blank.

Click **Config**

Once you have logged in, the **Home** screen will appear.

# Wizard

The Home > Wizard screen will appear. Click **Run Wizard** and the **Setup Wizard** will guide you through the basic configuration. For a tour of the **Wizard**, please see the following pages in this section.

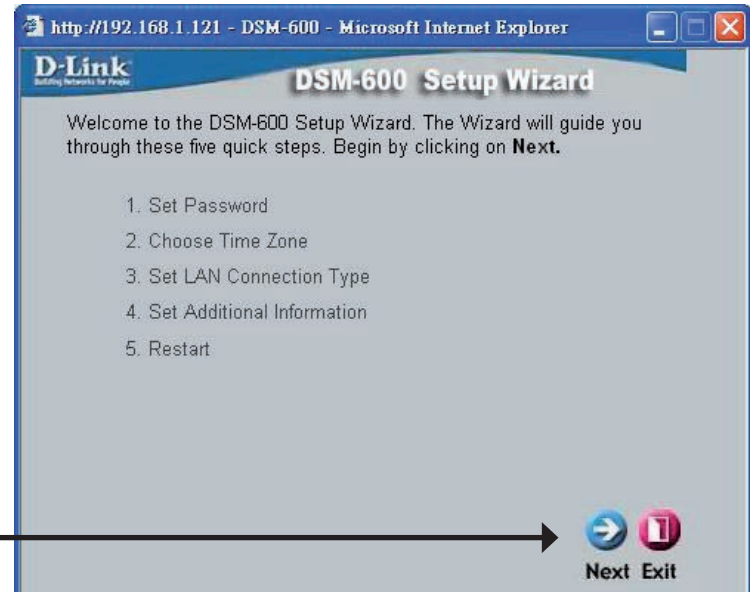

# Using the Setup Wizard

The Wizard will guide you through five steps:

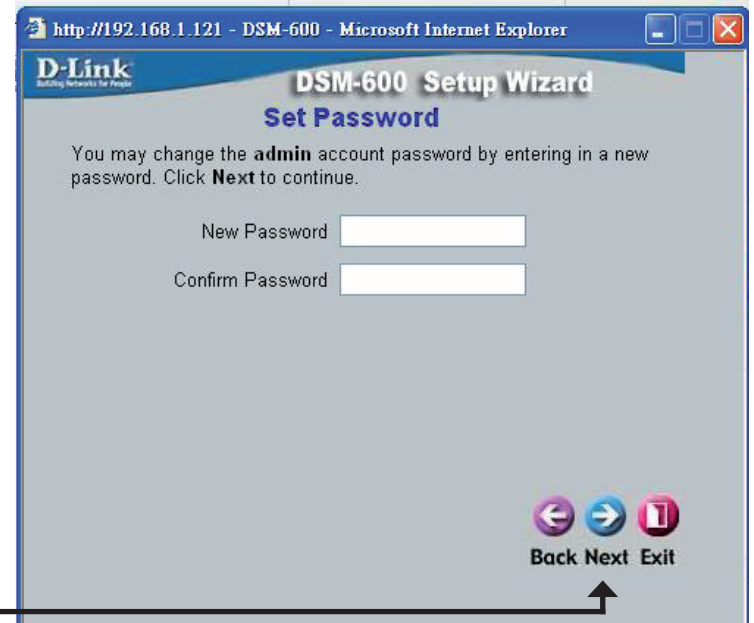

- Password
- Time Zone
- LAN Connection Settings
- Additional Settings

Click **Next**

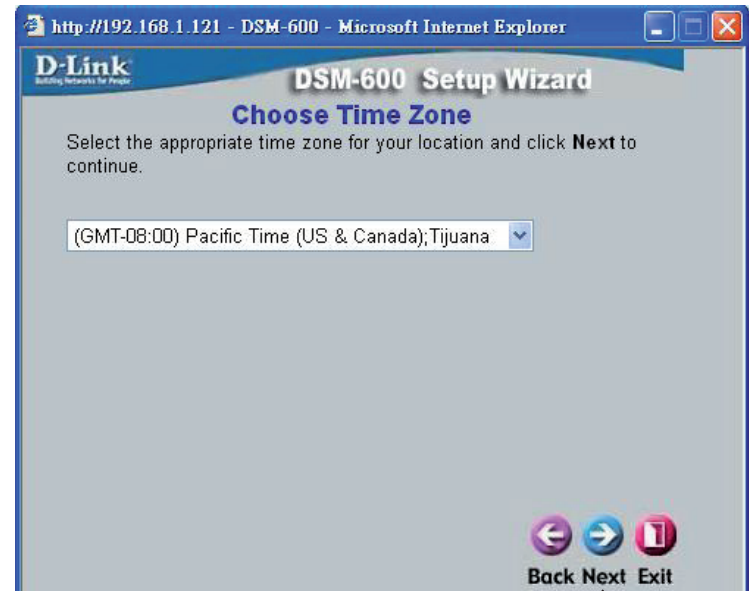

Create a new password for your DSM-600.

Click **Next**

Select your Time Zone from the drop-down menu.

Click Next

Select either Static or Dynamic IP address. When Static is selected, you will fill in these fields:

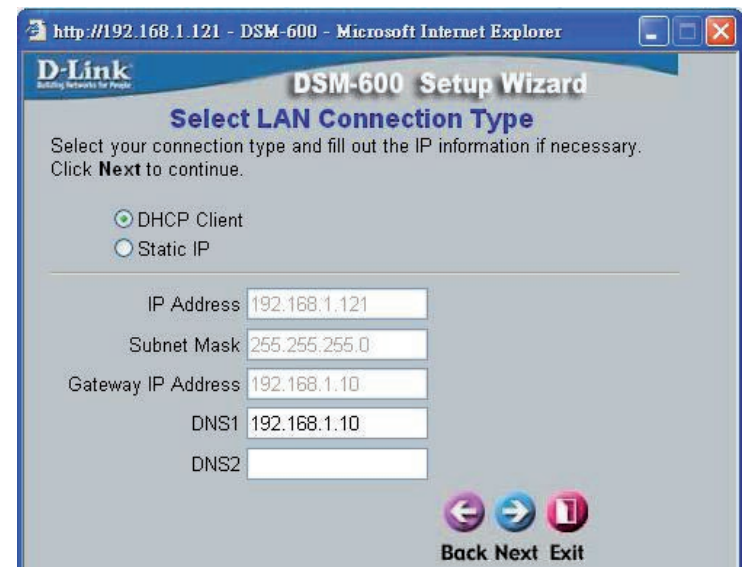

**Static IP Address**

**Subnet Mask**

**Gateway Address** - Usually the LAN address of your router.

**DNS Address** - A Domain Name Server translates Domain names into IP addresses.

Select **DHCP Client** when you have a DHCP server in your network. No other configuration is required on this screen when Dynamic IP address is selected.

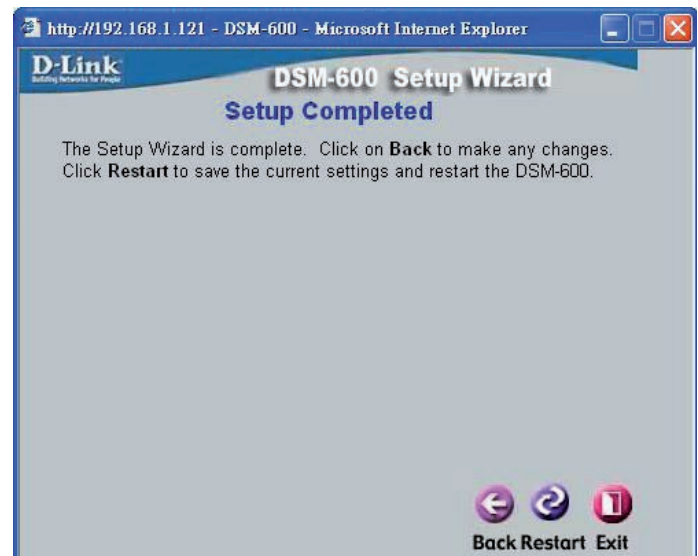

Click Next

Enter the **Workgroup** name, a **Name** for the DSM-600 (useful if you have multiple storage enclosures on your network), and a **Description**.

Click **Next**

Click **Restart**

**You have completed the basic configuration using the setup wizard!**

# Home LAN

**Speed:** Displays the current speed of the LAN port.

**Link Speed:** Select **Auto** (recommended) or **1000** and then click **Apply**.

**DHCP Client/Static IP:** Select either **DHCP Client** (default) if you have a DHCP server or router on your network, or **Static IP** if you want to assign the network settings manually.

**IP Address:** Enter the IP address of the DSM-600 here, when Static IP is selected.

**Subnet Mask:** Enter the subnet mask here, when Static IP is selected.

**Gateway Address:** Enter the gateway address here, when Static IP is selected. This is normally the LAN address of your router.

**DNS1/DNS2:** DNS (Domain Name System) is an Internet service that translates domain names into IP addresses. Enter a DNS address here. If you are using a router in your network, you can usually enter the router's LAN IP address as the DNS address.

**Apply:** Click **Apply** to save the changes.

You may also change the LAN IP address using the D-Link Easy Search Utility. Please refer to the appendix at the end of this manual for this process.

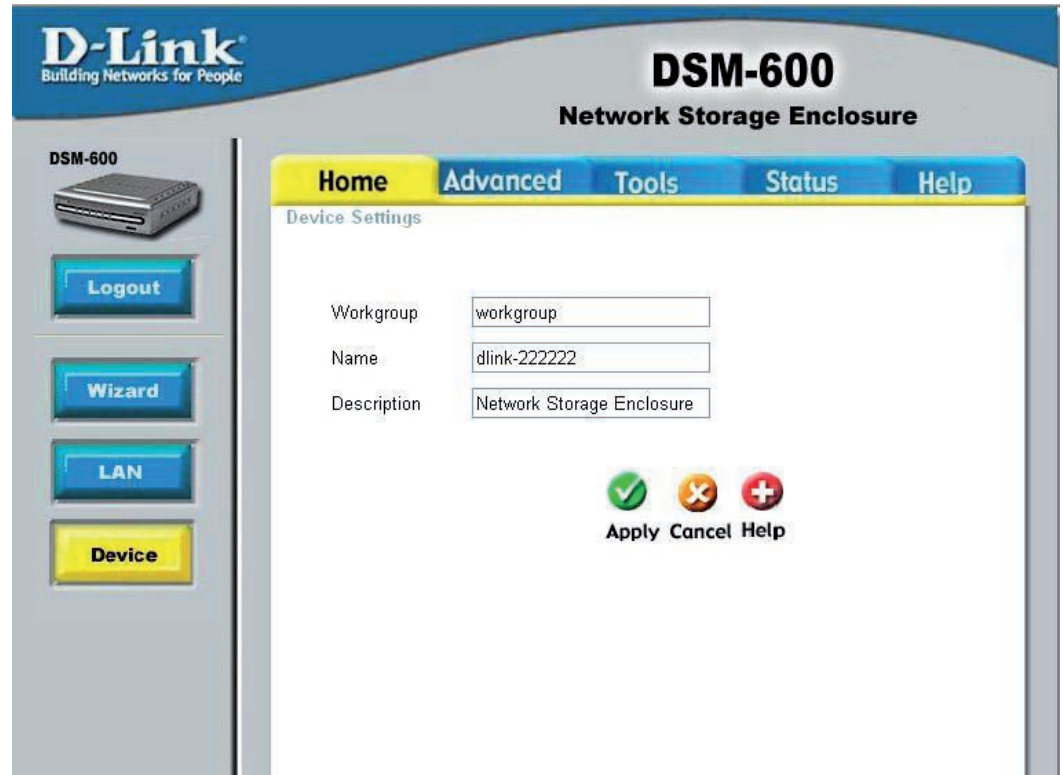

# Device

**Workgroup:** Enter workgroup name of your network.

**Name:** Enter a name for the DSM-600 device. The default device name of the DSM-600 is dlink - xxxxxx, where xxxxxx is the last six digits of the MAC address. This is useful if you have more than one DSM-600s on the network.

**Description:** Enter a description of the DSM-600.

The screenshot displays the D-Link DSM-600 Network Storage Enclosure configuration interface. The top navigation bar includes 'Home', 'Advanced', 'Tools', 'Status', and 'Help'. The 'Device Settings' section contains the following fields:

Workgroup	<input type="text" value="workgroup"/>
Name	<input type="text" value="dlink-222222"/>
Description	<input type="text" value="Network Storage Enclosure"/>

At the bottom of the settings area, there are three buttons: 'Apply' (with a green checkmark icon), 'Cancel' (with a red 'X' icon), and 'Help' (with a red plus icon).

The left sidebar contains a 'Device' button, which is highlighted in yellow, along with other buttons: 'Logout', 'Wizard', and 'LAN'. An image of the DSM-600 device is also visible in the sidebar.

# Advanced User

**User Name:** Enter a user name.

**Password:** Enter a password for the user.

**Confirm Password:** Enter the password again for confirmation.

**Apply:** Click **Apply** to save your settings.

The screenshot shows the D-Link DSM-600 Network Storage Enclosure web interface. The page title is "DSM-600 Network Storage Enclosure". The navigation menu includes Home, Advanced (selected), Tools, Status, and Help. The main content area is titled "User Accounts" and contains the following text: "User accounts will have access to the Download Scheduler area only." Below this text are three input fields: "User Name", "Password", and "Confirm Password". To the right of these fields are three icons: a green checkmark, a red X, and a red plus sign, labeled "Apply", "Cancel", and "Help" respectively. On the left side of the interface, there is a sidebar with a "Logout" button, a "User" button (highlighted in yellow), and buttons for "Network Access", "FTP Server", and "UPnP AV". Below the "User Accounts" section, there is a "User List" table with a "Change Password" icon and a "Delete" icon next to it. The table contains one entry: "1 user1".

Users you create will be listed under **User List**.

User List		Change Password	Delete
No.	User Name		
1	user1		

To change a current user's password, click the  icon next to a user listed under **User List**. Click **Apply** to save any changes.

To delete a user, click the  icon next to a user listed under **User List**. Click **Apply** to save any changes.

You will need to create users for assigning permissions, using FTP, and using the download schedule section.

## Network Access

**User:** Select a user from the drop-down menu or check **All Accounts**.

**Path:** Click **Open** and select the folder from the internal/USB drive that you would like to create the rule for.

**Authority:** Select **Read Only** or **Read/Write** from the drop-down menu.

**Comment:** Enter a comment regarding the rule (optional).

Share	Path	User	Comment	R/W
HDD_a	HDD_a			

By default, all users on your local network will have read/write permissions to all files and folders on the internal/USB drive(s) that are connected to the DSM-600. This “rule” will be displayed in the list similar to the picture above.

**Note:** Currently, you may only assign Read Only permissions to the USB drive(s) if formatted with NTFS (English only). To assign read/write permissions, USB drive(s) must be formatted with FAT32, EXT2, or EXT3.

To create a network access rule, you must first delete the default rule by clicking on the trash can icon. Once the rule is deleted, users will not be able to access the internal/USB drive(s) until new rules have been created.

Click the trash can icon to delete the rule.

Share	Path	User	Comment	R/W
HDD_a	HDD_a			R/W

## Example

In the example below, permissions are set for the folder “**Drivers**” on the internal drive named “**HDD\_a**”. Two users (user1 and user2) were created (refer to page 50 on creating users).

User1 has been assigned read/write permissions for the Drivers folder (as seen in the network access list).

User2 will be assigned read only permissions for the Drivers folder. Once the settings are applied, User2 will appear in the network access list.

The screenshot shows the D-Link DSM-600 Network Storage Enclosure web interface. The 'Advanced' tab is selected, and the 'Network Access Settings' section is visible. The 'User' dropdown is set to 'user1', the 'Path' is 'HDD\_a/Drivers', and the 'Authority' is 'Read Only'. Below the settings are 'Apply', 'Cancel', and 'Help' buttons. At the bottom, a table shows the network access list with one entry for 'Drivers' on 'HDD\_a/Drivers' for user 'user1' with 'R/W' permissions.

You may edit a rule from the list by clicking on the icon.

To delete a rule from the list, click on the icon.

# FTP Server

**User:** Select a user from the drop-down menu or check **All Accounts**. *Anonymous* will always be listed as a user.

**Path:** Click Open and select the folder from the interneal/USB drive that you would like to create the rule for.

**Root:** Check the Root box to select the root level of all the drives at once.

**Authority:** Select Read Only or Read/Write from the drop-down menu.

**Add:** Click **Add** to add the rule.

**Max User:** Select the maximum number of users allowed to connect via FTP at one time from the drop-down menu.

**Idle Time:** Select the idle time (1-10 minutes). Users will be disconnected when idle for the specified amount of time.

**Port:** You may change the port used for FTP. The default port is 21.

**Flow Control:** Select Unlimited or enter a data rate (x10 KB) for restricted data flow. This setting is only necessary where network traffic is significant and can be affected by FTP server activity.

The screenshot shows the D-Link DSM-600 Network Storage Enclosure web interface. The main content area is titled "FTP Server Settings" and contains the following fields and options:

- User:** A dropdown menu with "Please select a user" and a checkbox for "All accounts".
- Path:** A text input field with a "root" checkbox and an "Open" button.
- Authority:** A dropdown menu with "Read Only" selected and an "Add" button.
- Max User:** A dropdown menu with "05" selected.
- Idle Time:** A text input field with "2" and "(1~10 Minutes)".
- Port:** A text input field with "21" and "(1~65535, Default:21)".
- Flow Control:** Radio buttons for "Unlimited" (selected) and a text input field for "x 10 KBs".
- Path:** Checkboxes for "Read/Write" (checked), "Read Only", and "Modify Setting", along with a "Delete" button.

Below the settings form is the "FTP Server Status" section, which displays the following information:

Status	Started
Port	21
Max User	5
Flow Control	Unlimited
Idle Time	2 Minutes

At the bottom of the status section is a "Stop FTP Server" button.

**Path:** Displays current FTP users, paths, and permissions.

**FTP Server Status:** Displays the current information regarding the FTP server.

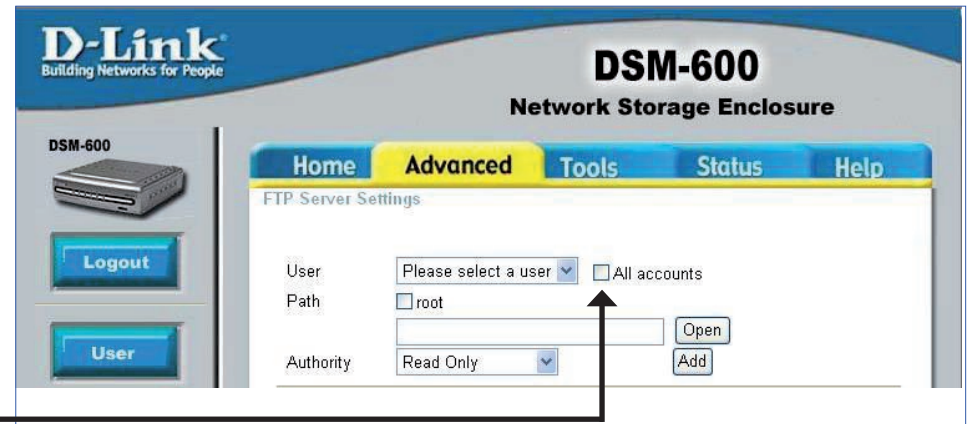

You may edit a rule from the list by clicking on the  icon.

To delete a rule from the list, click on the  icon.

### Example:

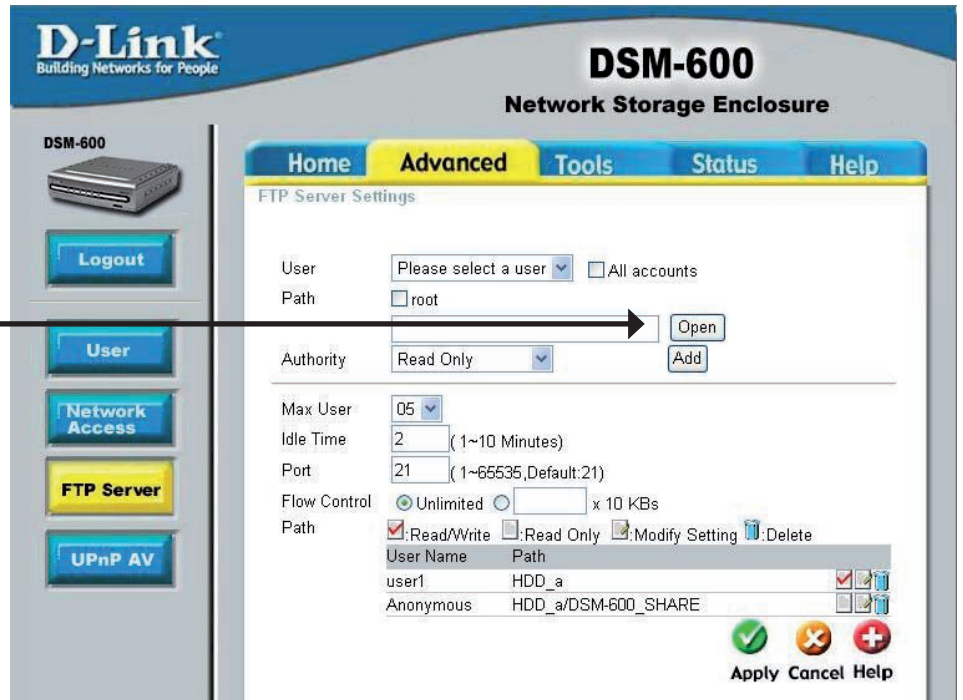

Log into the web-based configuration by launching the Easy Search Utility or by opening a web browser and entering **http://device name**, where device name is the name assigned to the DSM-600. If you did not change the name, the default name is “dlink-xxxxxx” where xxxxxx is the last six digits of the DSM-600’s MAC address. You may also enter the IP address of the device.

Click **Advanced** and then click **FTP Server**.

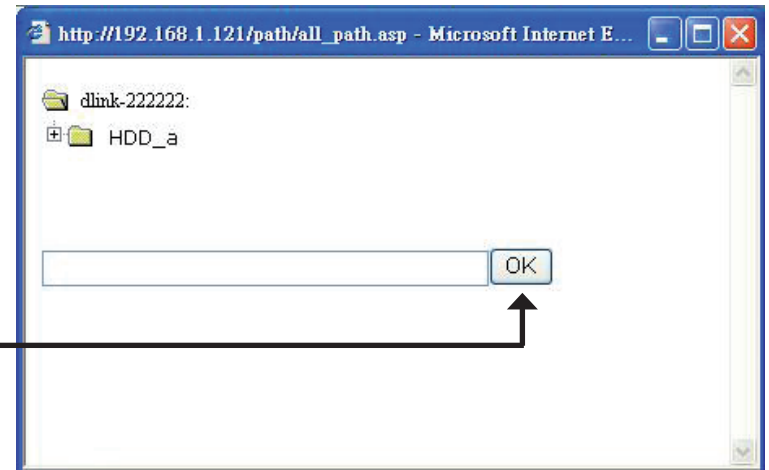

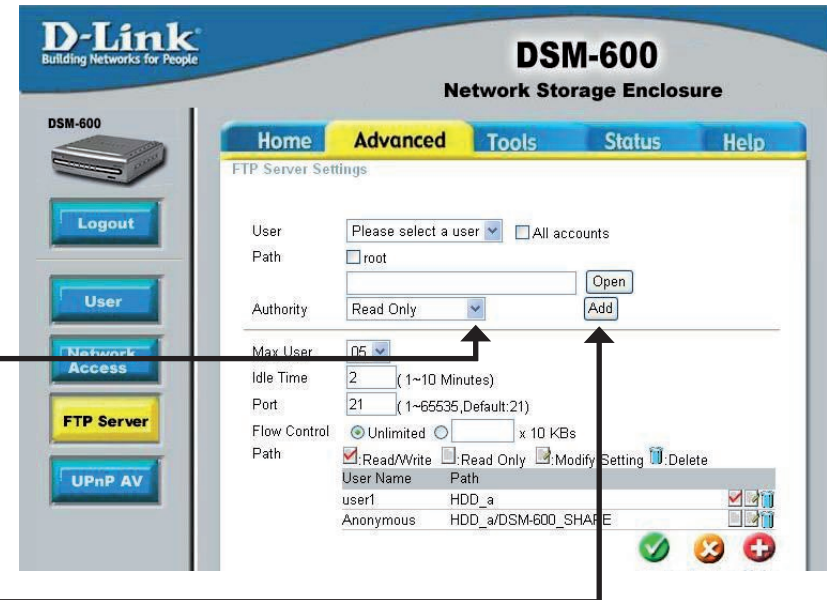

Select a user from the drop-down menu or check **All Accounts**.

Click **Open** to select the folder you want to allow FTP access to. Check **Root** to assign access to all the drives at once.

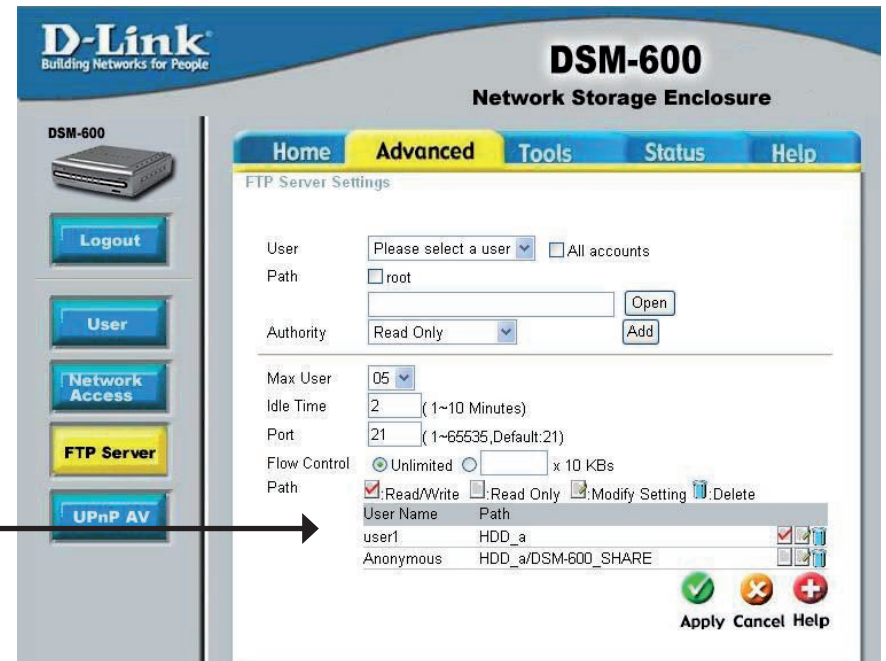

If Root is not checked, select the folder and click **OK**. Click the + sign to expand the folder tree.

Select Read Only or Read/Write.

Click Add.

The rule will be listed under Path. The rule shown will allow an anonymous user access to the root folder on the drive with Read-Only permissions.

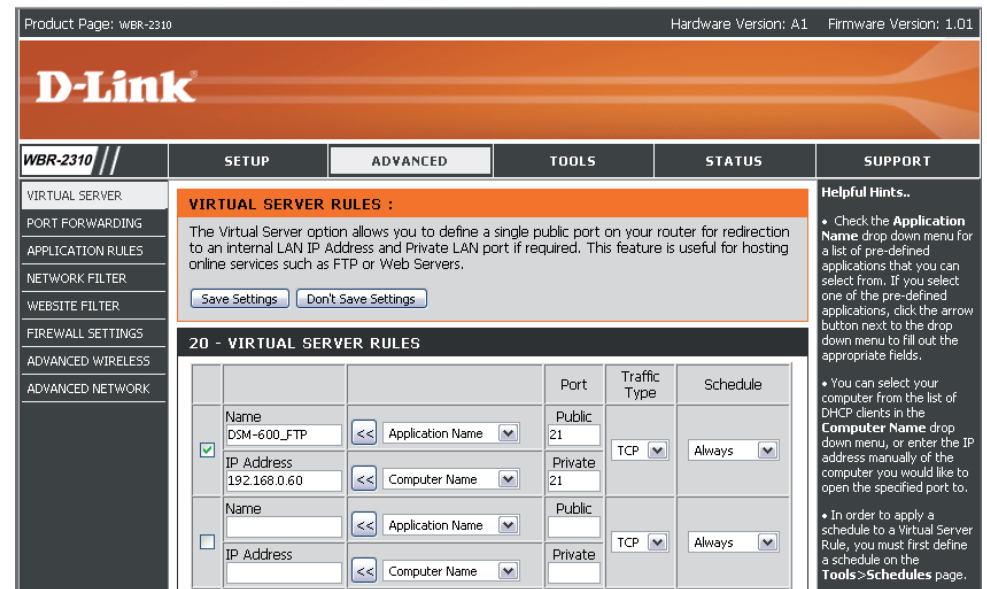

You may edit a rule from the list by clicking on the  icon. To delete a rule from the list, click on the  icon.

To access the FTP server from your local network, open a web browser and enter **ftp://device name**, where device name is the name assigned to the DSM-600. If you did not change the name, the default name is “dlink-xxxxxx” where xxxxxx is the last six digits of the DSM-600’s MAC address. You may also enter the IP address of the device.

If you are behind a router, you will need to forward the FTP port to the DSM-600. Additional filtering and firewall settings may need to be modified on your router to allow FTP access to the DSM-600 from the Internet. Once the port is forwarded to the DSM-600, users from the Internet will enter ftp:// followed by the WAN IP address of the router (e.g. ftp://64.56.23.111).

If you are using a D-Link router, such as the WBR-2310 used in the example below, your port forwarding rule should be similar to the following:

- Name** Name the DSM-600 FTP server rule.
- IP Address** Enter the IP address of the DSM-600.
- Public Port** Enter the public FTP port. By default, the port is 21.
- Private Port** Enter the private FTP port. By default, the port is 21.
- Traffic Type** Set the traffic type to **TCP**.

Product Page: WBR-2310 Hardware Version: A1 Firmware Version: 1.01

**D-Link**

WBR-2310 // SETUP ADVANCED TOOLS STATUS SUPPORT

VIRTUAL SERVER

**VIRTUAL SERVER RULES :**

The Virtual Server option allows you to define a single public port on your router for redirection to an internal LAN IP Address and Private LAN port if required. This feature is useful for hosting online services such as FTP or Web Servers.

Save Settings Don't Save Settings

**20 - VIRTUAL SERVER RULES**

		Port	Traffic Type	Schedule
<input checked="" type="checkbox"/>	Name DSM-600_FTP	Public 21	TCP	Always
	IP Address 192.168.0.60	Private 21		
<input type="checkbox"/>	Name	Public	TCP	Always
	IP Address	Private		

**Helpful Hints..**

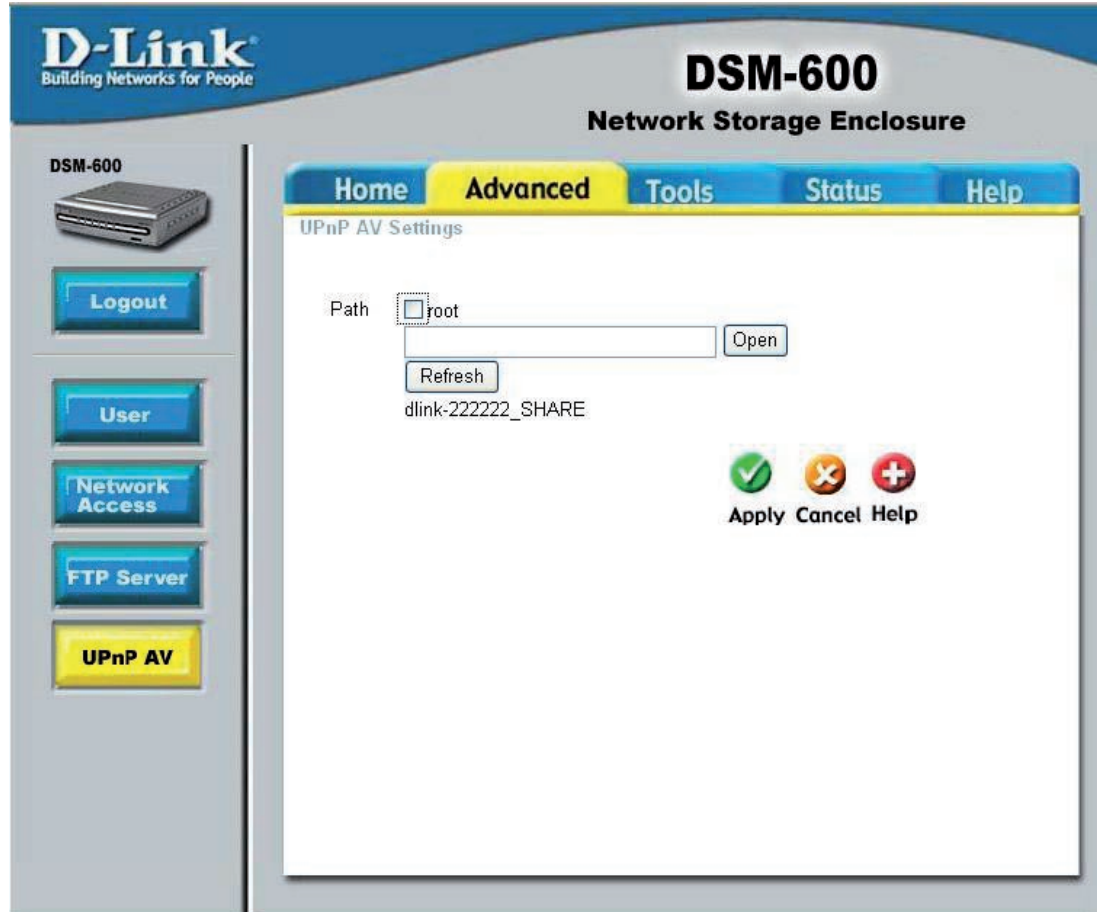

- Check the **Application Name** drop down menu for a list of pre-defined applications that you can select from. If you select one of the pre-defined applications, click the arrow button next to the drop down menu to fill out the appropriate fields.
- You can select your computer from the list of DHCP clients in the **Computer Name** drop down menu, or enter the IP address manually of the computer you would like to open the specified port to.
- In order to apply a schedule to a Virtual Server Rule, you must first define a schedule on the **Tools>Schedules** page.

If you are using a port other than 21, you must enter a colon (:) followed by the new port number in the URL to connect (e.g. ftp://ftp.mysite.com:**3000**).

Please consult your router’s user manual for more information on port forwarding.

# UPnP AV

The DSM-600 has a built-in media server that can be used with media streaming devices. Click **Open** to locate the folder which contains your media files (video, music, and photos).

**Root:** checking “root” will allow UPnP AV access to all drives and all folders.

**Refresh:** Clicking the **Refresh** button is necessary wherever you add new content to the hard drive. Your UPnP AV media player will not find this new content until you click **Refresh**.

# Tools Admin

**User Name:** The user name is set to admin. You cannot change the user name.

**Password:** Enter the old password.

**New Password:** Enter your new password.

**Comfirm Password:** Enter your new password again.

**Apply:** Click Apply to save your new password.

The screenshot shows the D-Link DSM-600 Network Storage Enclosure web interface. The top navigation bar includes 'Home', 'Advanced', 'Tools' (highlighted), 'Status', and 'Help'. The main content area is titled 'Administrator's Password' and contains the instruction 'Set the administrator password here.'. Below this, there are four input fields: 'User Name' (pre-filled with 'admin'), 'Password', 'New Password', and 'Confirm Password'. At the bottom right of the form, there are three buttons: 'Apply' (with a green checkmark icon), 'Cancel' (with a red X icon), and 'Help' (with a red plus icon). A left sidebar contains a 'Logout' button and a vertical menu of system management options: 'Admin' (highlighted in yellow), 'Time', 'System', 'Firmware', 'Disk Utility', and 'E-Mail Alerts'.

# Time

This section will set the DSM-600 internal clock. It is important that accurate time is set for scheduled downloading and backup of files and folders.

Current Time is displayed in 24-hour format (e.g. 14:00 is 2:00pm). Current Date is displayed in Month/Day/Year format.

**Default NTP Server:** Network Time Protocol (NTP) synchronizes clocks on devices in the network, using internet time servers. This field is optional.

**Set time from my computer:** Synchronize the time from the computer you are currently using. Click the Set Time button to set the DSM-600 internal clock to the local PC time.

**Set the Time:** Select the appropriate date and time from the drop-down boxes provided. Click the Set Time button to set the DSM-600 internal clock to the changes made.

**Time Zone:** Select the time zone.

**Daylight Saving Time:** Select to enable daylight savings.

**Time:**

**Apply:** Click Apply to save your settings.

# System

**System Restart:** Click **Restart** to reboot your DSM-600.

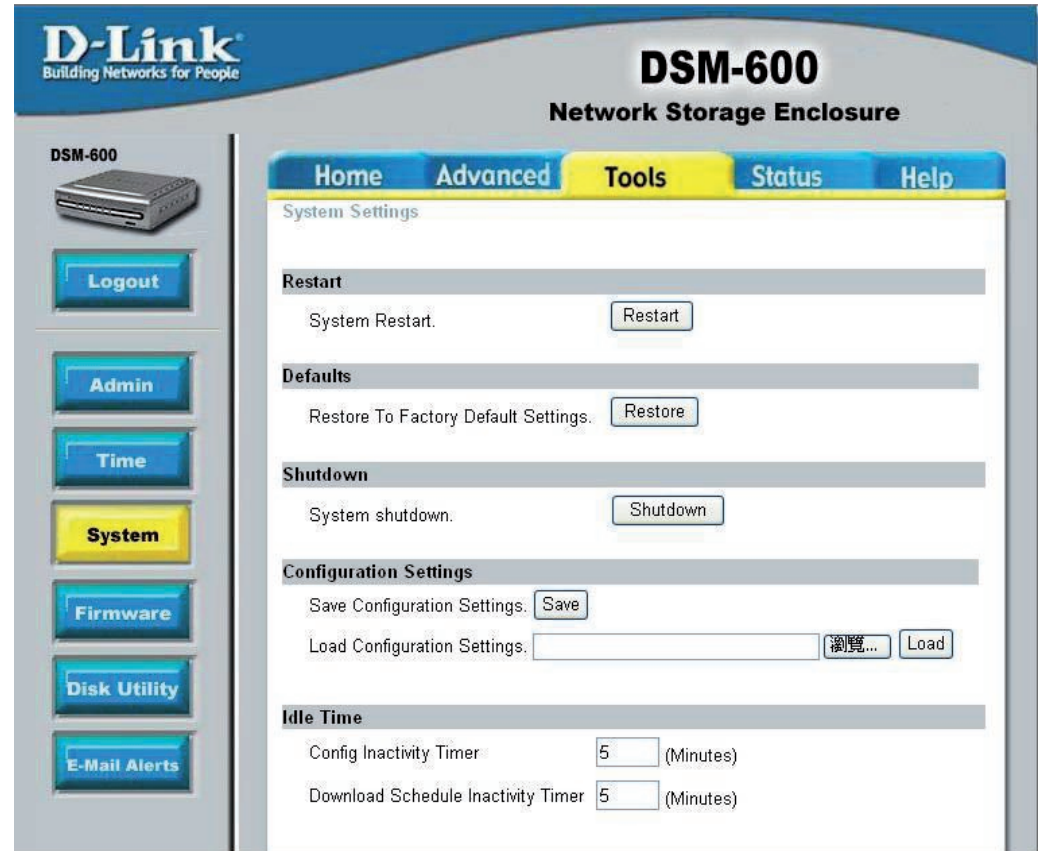

**Restore to Factory Defaults:** Click **Restore** to reset the DSM-600 back to the factory default settings - erasing all changes you have made.

**System shutdown:** Click shutdown to turn off your DSM-600

**Configuration Settings:** You can save all device settings to a file which can be saved to your computer. Then later, if something happens and you need your settings back, you can load them up again by loading this file.

**Idle Time:** Enter the time (in minutes) for the idle time in both the Scheduling and Config sections. Users will be logged off if the idle time is exceeded.

**Apply:** Click **Apply** to save your settings.

# Firmware

**Browse:** After you have downloaded the firmware upgrade file to your hard drive, click Browse to find the upgrade. When you have found it, click Open in the browser window and click Apply in this screen to begin the firmware upgrade.

When the “upgrade is complete” message appears, click Restart. After the login screen appears, wait until the power LED stops blinking before logging into the DSM-600.

The screenshot displays the D-Link DSM-600 Network Storage Enclosure web interface. The top navigation bar includes 'Home', 'Advanced', 'Tools' (highlighted), 'Status', and 'Help'. The main content area is titled 'Firmware Upgrade' and contains the following text:

Please check the support site at <http://support.dlink.com> for new firmware update.

How to update firmware:

1. Download and Save the firmware from our support site.
2. Click on the "Browse" button to select the path of the new firmware.
3. Click on "Apply"

Current Firmware Version : 1.02  
Firmware Date : 09/14/2006

File path  瀏覽...

At the bottom right, there are three buttons: 'Apply' (with a green checkmark icon), 'Cancel' (with an orange 'X' icon), and 'Help' (with a red plus icon).

The left sidebar contains a 'DSM-600' header with a device image, and a vertical menu with buttons for 'Logout', 'Admin', 'Time', 'System', 'Firmware' (highlighted), 'Disk Utility', and 'E-Mail Alerts'.

# Disk Utility

**Disk:** Select the hard drive you would like to format from the drop-down menu. Formatting the drive will erase all data on the drive.

**File System:** Select the file type you want to format your drive to: **EXT3**, **EXT2**, or **FAT32**.

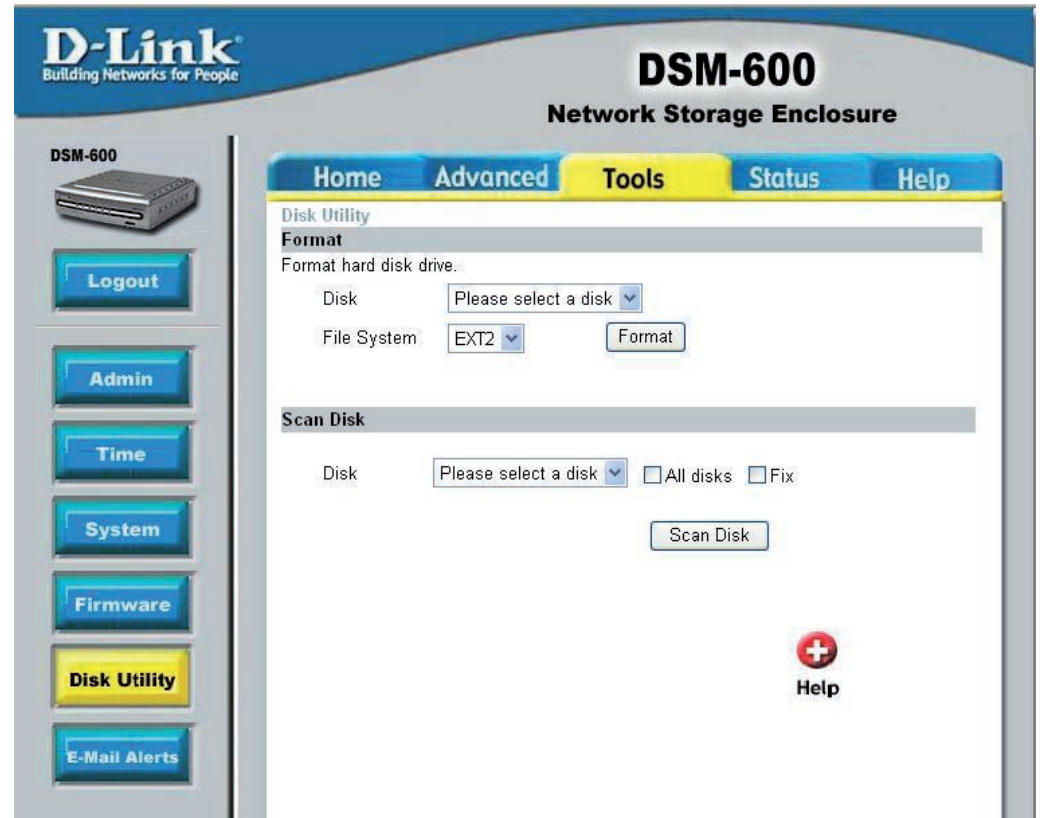

**Format Button:** Click the **Format** button to start the formatting process.

**Scan Disk:** Select the hard drive you want to scan for errors from the drop-down menu.

**All Disk:** Check to select all drives.

**Fix:** The DSM-600 will automatically fix any errors found. You cannot uncheck this option.

**Scan Disk Button:** Click the **Scan Disk** button to start the scanning process.

## E-mail Alerts

**Login Method:** Select either **Account** or **Anonymous**.

**User Name:** Enter your user name used to connect to your email account (only when Account is selected).

**Password:** Enter your password (only when Account is selected).

**SMTP Server:** Enter the IP address or DNS name (e.g.mail.myisp.net).

**Sender Email:** Enter the “from” email address (e.g. log@dsmg600.com). This address does not have to be a valid address. If your email client software is filtering spam, make sure you “allow” this email address to be received.

**Receiver Email:** Enter the email address you want to send the alerts to.

**Space Status:** Check to send information on the amount of space available. You may select a time interval of how often to send the email.

**Disk Full:** Check to send an email when the disk is full.

**Hard Drive Failure:** Check to send an email when the hard drive fails.

**Administrator Password Changed:** Check to send an email when the admin password has been changed.

The screenshot shows the D-Link DSM-600 Network Storage Enclosure web interface. The page title is "DSM-600 Network Storage Enclosure". The navigation tabs are "Home", "Advanced", "Tools", "Status", and "Help". The "Tools" tab is selected, and the "E-Mail" configuration page is displayed. The page includes a sidebar with buttons for "Logout", "Admin", "Time", "System", "Firmware", "Disk Utility", and "E-Mail Alerts". The main content area is titled "E-Mail" and contains the following settings:

- Email Notification Settings:**
  - Login Method:  Account  Anonymous
  - User Name:
  - Password:
  - SMTP Server:
  - Sender Email:
  - Receiver Email:
- Send Notification:**
  - Space Status Interval:  (Hours)  (Minutes)
  - Disk Full
  - Hard Drive Failure
  - Administrator Password Changed
  - Firmware Upgraded
  - Internal Hard Drive Temperature exceed  Fahrenheit °F

At the bottom right, there is a "Test E-Mail" button and three icons: a green checkmark (Apply), an orange X (Cancel), and a red plus sign (Help).

**Firmware Upgrade:** Check to send an email when the firmware has been updated.

**Overheat:** If the internal temperature goes over the specified number, an e-mail will be sent to notify you. This number is set to the 'danger level' by default but can be adjusted to whatever you want.

**Test Email Button:** Click to send a test email to verify your login settings.

## Status Device Info

**LAN Info:** The LAN Info section will display the network settings of the DSM-600.

**Device Info:** The workgroup, name, and description of the DSM-600 will be displayed in this section.

**Internal HD Info:** Displays information about your internal/USB hard drive such as total size, space used, and space available.

**Network Access List:** Current shares and permissions will be displayed in this section.

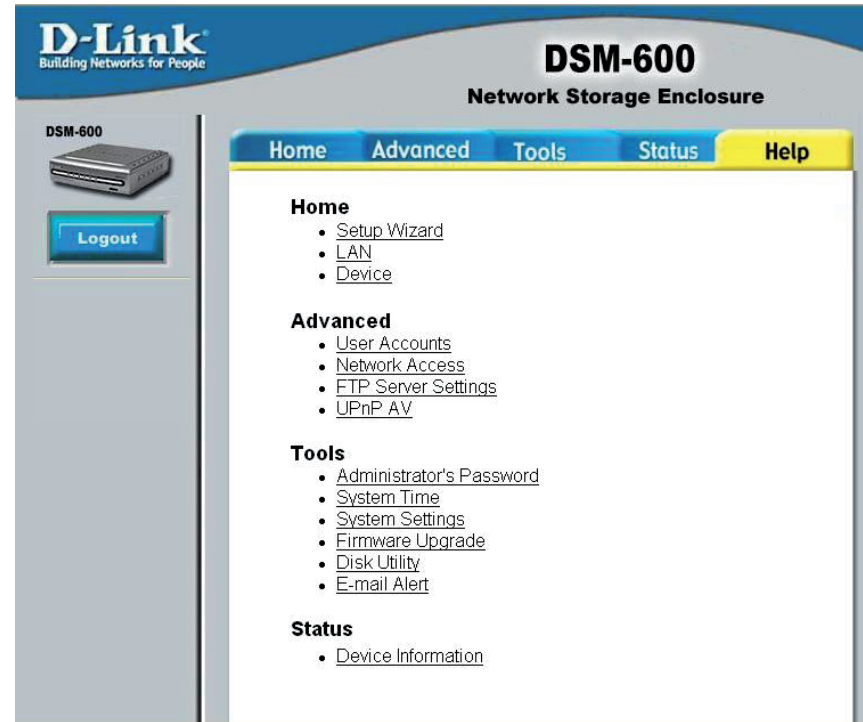

The screenshot shows the D-Link DSM-600 web interface. The top navigation bar includes Home, Advanced, Tools, Status (selected), and Help. The main content area is divided into sections:

- LAN Info:**
  - IP Address: 192.168.0.113
  - Subnet Mask: 255.255.255.0
  - Gateway IP Address: 192.168.0.1
- Device Info:**
  - Workgroup: workgroup
  - Name: dlink-222222
  - Description: Network Storage Enclosure
- HD Info:**
  - Device Name: HDD\_a
  - Total Disk Size: 78257380 KB
  - Used Space: 8 KB
  - Disk Size Remaining: 78257372 KB
  - Temperature: 95°F
- Network Access List:**

Path	Permissions	Access Control
HDD_a	Read/Write	Open mode

A Help icon is visible in the bottom right corner of the interface.

# Help

This section lists all of the available help topics for reference. Click on a topic to view the online help information.

# Download Scheduling

This function will allow the user to set up scheduled folder or file downloads and backup jobs.

To log into the web-based configuration of the DSM-600, you may run the Easy Search Utility included on your CD or type in **http://dsm-600** into a web browser.

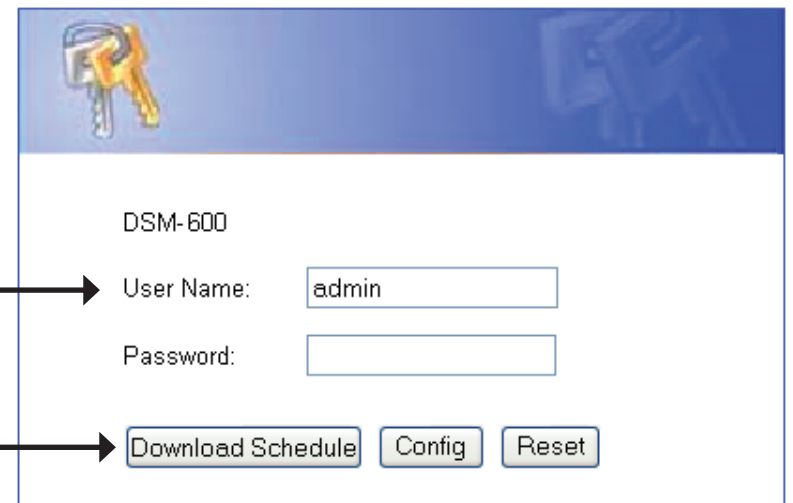

Open your Web browser and type **http://dsm-600** into the URL address box and then press the **Enter** or **Return** key.

The logon screen will appear.

Type **admin** for the username and leave the password field blank.

Click **Download Schedule**.

**Login Method:** Select the appropriate login method to access files for download:

- **Account** – If the download site employs restricted access, check this button and enter in the User Name and Password in the appropriate fields provided below this button.
- **Anonymous** – Click this button if this job is a local (drive/PC to drive) backup or the download site does not require any login information.

**Type:** Select the file or folder depending on what you want to download or backup.

**URL:** Enter a valid URL to the remote location from which you wish to initiate a file or folder transfer.

To download from a remote FTP or HTTP server, refer to the following examples of valid URL formats:

- **ftp://123.45.67.89/Test** (for a folder download from a FTP server)
- **ftp://123.45.67.89/Test/hello.txt** (for a single file download from a FTP server)
- **http://www.abc123.org/test.txt** (for a single file download from a HTTP server)

To initiate a transfer of a shared file or folder from a networked PC, refer to the following example of the valid URL format.

- **\\192.168.0.100\Test.txt**

The PC's internal IP address must be known and be accessible to the DSM-600 on the network.

**Test:** This button is provided to test the given URL to make sure it is valid as well as the user name/password authentication set in **login method**.

The screenshot shows the D-Link DSM-600 Network Storage Enclosure web interface. The main heading is "DSM-600 Network Storage Enclosure". Below the heading are three tabs: "Scheduling" (selected), "Status", and "Help". On the left side, there is a "Logout" button. The "Scheduling Settings" section contains the following fields and options:

- Login Method:** Radio buttons for "Account" and "Anonymous" (selected).
- User Name:** Text input field with "\*\*\*\*\*" placeholder.
- Password:** Password input field with "\*\*\*\*\*" placeholder.
- Type:** Dropdown menu set to "File".
- URL:** Text input field with "Test" and "Local" buttons.
- Save To:** Text input field with "Open" button.
- When:** Date and Time selection fields. Date is set to 01/01/2005, and Time is set to 01:23.
- Recurring Backup:** Dropdown menu set to "None". Below it are two small dropdowns for "00" and "00".
- Incremental Backup:** A checkbox labeled "Incremental Backup (Only for local backup)" which is currently unchecked.

At the bottom right of the settings section are three buttons: "Apply" (green checkmark), "Cancel" (orange X), and "Help" (red plus). Below the settings is a "Schedule list" table with columns for "Status", "Download Path", "Save To", "Time", and "Del". The table currently has one row with "Status" and "Download Path" visible. At the bottom right of the page are two more buttons: "Refresh" (blue circular arrow) and "Help" (red plus).

**Local:** This button will let you set the source file or folder from any internal IDE/external USB drive connected to the DSM-600. When you click on the button, a window will appear with a graphical representation of the folder structure on the internal IDE/external USB drive(s).

To select a folder, click on the plus sign next to the internal IDE/external USB drive name to reveal all sub-folders available. When the folder you want is displayed, click on the folder name, scroll to the bottom of the folder structure, and verify the correct folder path is listed.

If the folder path is correct, click on the OK button to accept.

If you wish to specify a single file to transfer, follow the above process to select the desired folder and then manually type in the file name at the end of the folder path displayed in the URL field.

**Save To:** Enter a valid destination folder path to an attached internal IDE/external USB drive on DSM-600. Click on the **Open** button to begin the browsing process.

**When:** Enter the date and time you wish the file or folder transfer to commence. The current date and time according to the DSM-600 internal clock will be displayed in the various drop-down boxes that appear as a reference point. The format of the date is Year/Month/Day. The time is set and displayed in 24 hour format.

**Recurring Backup:** If you wish to make unattended backups at regular intervals, then designate the appropriate interval (e.g. daily, weekly, or monthly) and specific time for the backup to occur.

**Incremental Backup:** By default all backups and file/folder downloads are in Overwrite mode. This means that files at the destination drive/folder with identical names will be written over by the source files (also known as “Full Backup”). If the Incremental Backup option is checked, then DSM-600 will compare identical file names at source and destination by Last Modified Date/Time and overwrite the destination if the source is more recent.

**Note:** Incremental Backup is not available for HTTP or FTP downloads as the Last Modified Date/Time is not accessible at the remote location.

**Schedule List:** The Schedule List will display all completed, active, and pending scheduled transfer or backup jobs. Additional options are available to initiate or cancel an active or pending backup job immediately.

# Using the Easy Search Utility

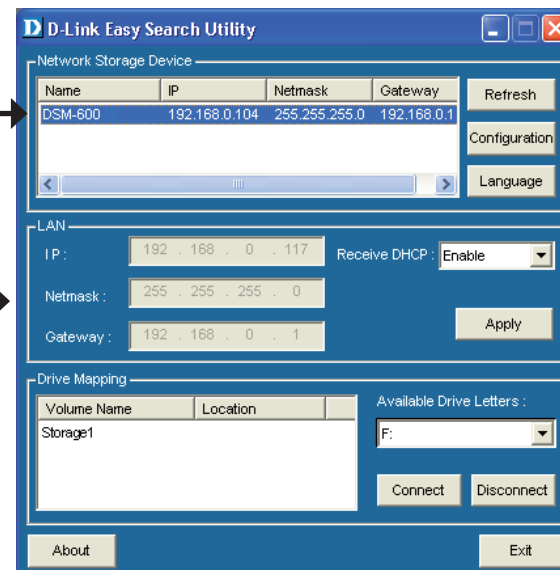

The D-Link Easy Search utility will allow you to connect to the web-based configuration utility, assign IP address settings to the DSM-600, and map drives to your computer.

Insert the DSM-600 CD into your CD-ROM drive.

Click **Easy Search Utility**.

Highlight an available DSM-600 and click **Configuration** to access the web-based utility.

To assign a static IP, highlight the DSM-600 and select **Disabled** from the DHCP Client drop-down menu. Enter the new IP address and network settings. Click **Apply** to save the settings.

Refer to page 12 for Mapping a Drive instructions.

# Storing non-English Character Files

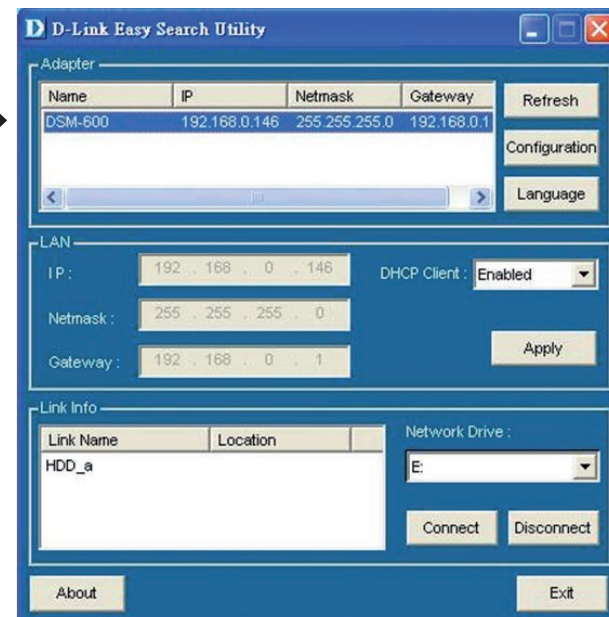

If you are storing non-English character files, you will need to change the Language setting from the Easy Search utility to ensure full compatibility with those files.

Insert the DSM-600 CD into your CD-ROM drive.

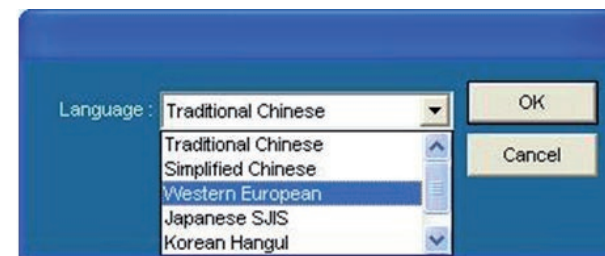

Click **Easy Search Utility**.

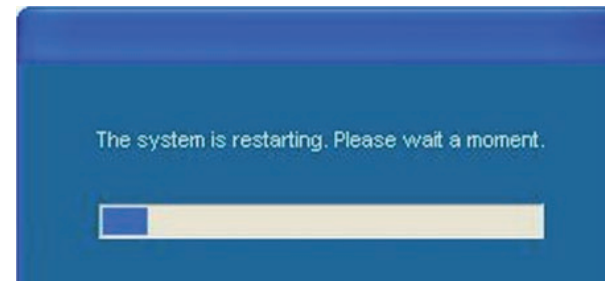

Highlight an available DSM-600 and click **Language**

Select the appropriate language from the drop-down menu and click **OK**.

The DSM-600 will restart.

**Note** : Changing the language setting will NOT change the display language of the user interface. It is only for supporting non-English character file names.

# Networking Basics

## Checking the IP Address in Windows XP

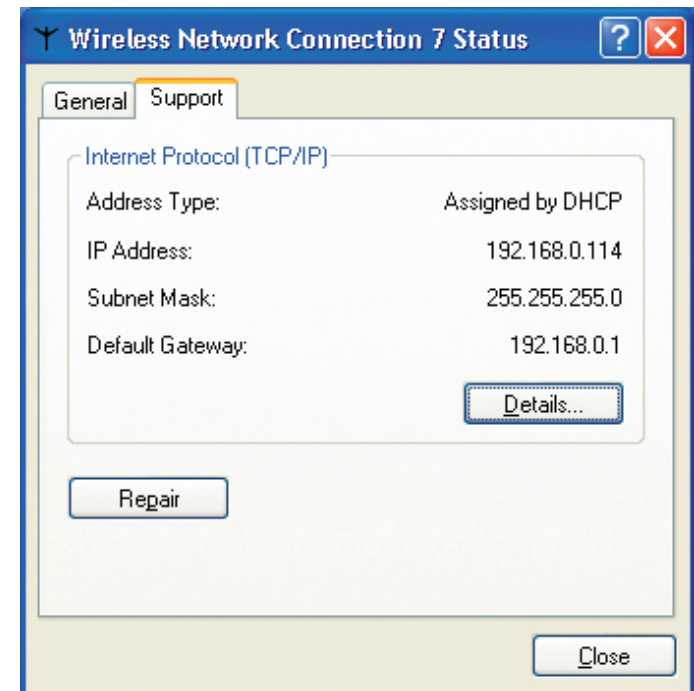

The computers in your network must be in the same IP Address range (see Getting Started in this manual for a definition of IP Address Range). To check the IP Address of the adapter, please do the following:

- Right-click on the **Local Area Connection** Icon in the task bar.
- Click on **Status**.

This window will appear:

- Click the **Support** tab. This screen will list your IP address, subnet mask, and the default gateway.
- Click **Close**.

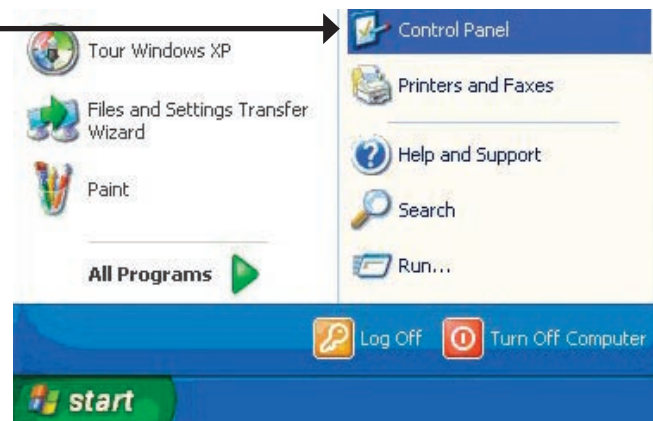

## Assign a Static IP Address (Windows® XP/2000)

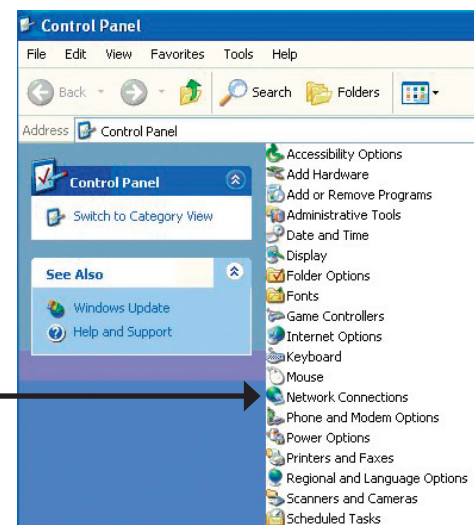

Note: DHCP enabled routers will automatically assign IP addresses to the computers on the network, using DHCP (Dynamic Host Configuration Protocol) technology. If you are using a DHCP-capable router you will not need to assign a static IP address.

If you are not using a DHCP capable router, or you need to assign a static IP address, please follow these instructions:

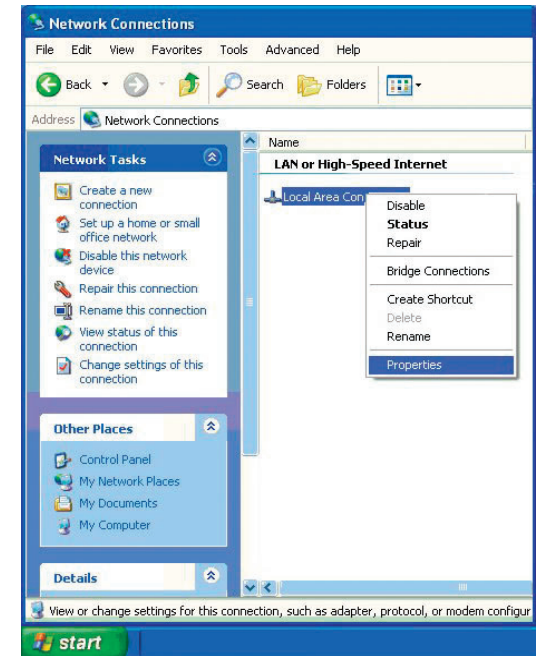

Go to **Start** and double-click on **Control Panel**.

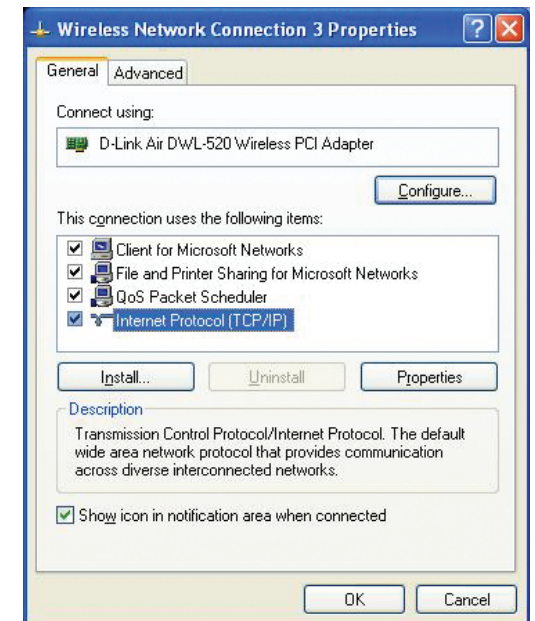

Double-click on **Network Connections**.

- Right-click on the **Local Area Connection** icon in the task bar.
- Double-click on **Properties**.

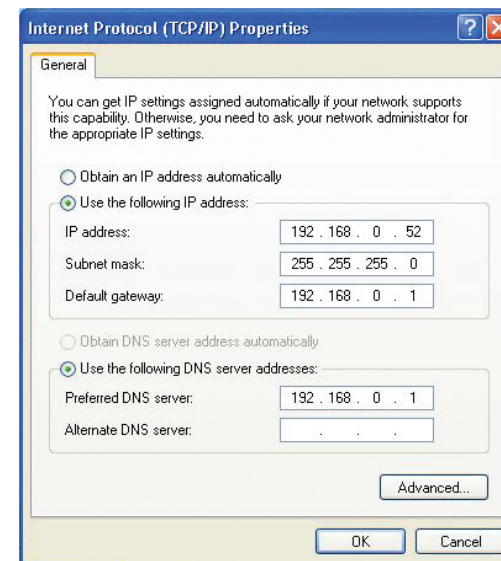

- Click on **Internet Protocol (TCP/IP)**.
- Click **Properties**.
- Input your **IP address and subnet mask**. (The IP addresses on your network must be within the same range. For example, if one computer has an IP address of 192.168.0.3 and 192.168.0.4. The subnet mask must be the same for all the computers on the network.)

- Input your DNS server addresses. **(Note: If you are entering a DNS server, you must enter the IP address of the default gateway.)**

The DNS server information will be shipped by your ISP (Internet Service Provider.) transmissions bolt up to 3vze engine

- Click **OK**

# Technical Specifications

## Standards

- IEEE 802.3
- IEEE 802.3u
- IEEE 802.3ab

## Device Management

- Web-Based - Internet Explorer v6 or later; Netscape Navigator v7 or later; or other Java-enabled browsers.

## Ports

- 1 10/100/1000 Gigabit Ethernet Port
- 2 USB 2.0 Ports
- Power

## Power

- Output 12V, 3A
- Max Power 36W, 100-110V

## Weight

1.7 lbs.

## LEDs

- Power
- LAN
- HDD
- HDD Full
- USB

## Temperature

- Operating: 32°F to 131°F (0°C to 55°C)
- Storing: -4°F to 158°F (-20°C to 70°C)

## Humidity

- 5%-90% (non-condensing)

## Certifications

- FCC Part 15 Class B

## Dimensions

- L = 7.69 inches
- W = 6.96 inches
- H = 2.41 inches

## Warranty

- 1 Year

# Contacting Technical Support

Before you contact technical support, please have the following ready:

- Model number of the product (e.g. DSM-600)
- Hardware Revision (located on the label on the bottom of the router (e.g. rev B1))
- Serial Number (s/n number located on the label on the bottom of the router).

You can find software updates and user documentation on the D-Link website as well as frequently asked questions and answers to technical issues.

# Warranty

Subject to the terms and conditions set forth herein, D-Link Systems, Inc. (“D-Link”) provides this Limited Warranty:

- Only to the person or entity that originally purchased the product from D-Link or its authorized reseller or distributor, and
- Only for products purchased and delivered within the fifty states of the United States, the District of Columbia, U.S. Possessions or Protectorates, U.S. Military Installations, or addresses with an APO or FPO.

## **Limited Warranty:**

D-Link warrants that the hardware portion of the D-Link product described below (“Hardware”) will be free from material defects in workmanship and materials under normal use from the date of original retail purchase of the product, for the period set forth below (“Warranty Period”), except as otherwise stated herein.

- Hardware (excluding power supplies and fans): One (1) year
- Power supplies and fans: One (1) year
- Spare parts and spare kits: Ninety (90) days

The customer’s sole and exclusive remedy and the entire liability of D-Link and its suppliers under this Limited Warranty will be, at D-Link’s option, to repair or replace the defective Hardware during the Warranty Period at no charge to the original owner or to refund the actual purchase price paid. Any repair or replacement will be rendered by D-Link at an Authorized D-Link Service Office. The replacement hardware need not be new or have an identical make, model or part. D-Link may, at its option, replace the defective Hardware or any part thereof with any reconditioned product that D-Link reasonably determines is substantially equivalent (or superior) in all material respects to the defective Hardware. Repaired or replacement hardware will be warranted for the remainder of the original Warranty Period or ninety (90) days, whichever is longer, and is subject to the same limitations and exclusions. If a material defect is incapable of correction, or if D-Link determines that it is not practical to repair or replace the defective Hardware, the actual price paid by the original purchaser for the defective Hardware will be refunded by D-Link upon return to D-Link of the defective Hardware. All Hardware or part thereof that is replaced by D-Link, or for which the purchase price is refunded, shall become the property of D-Link upon replacement or refund.

### **Limited Software Warranty:**

D-Link warrants that the software portion of the product (“Software”) will substantially conform to D-Link’s then current functional specifications for the Software, as set forth in the applicable documentation, from the date of original retail purchase of the Software for a period of ninety (90) days (“Software Warranty Period”), provided that the Software is properly installed on approved hardware and operated as contemplated in its documentation. D-Link further warrants that, during the Software Warranty Period, the magnetic media on which D-Link delivers the Software will be free of physical defects. The customer’s sole and exclusive remedy and the entire liability of D-Link and its suppliers under this Limited Warranty will be, at D-Link’s option, to replace the non-conforming Software (or defective media) with software that substantially conforms to D-Link’s functional specifications for the Software or to refund the portion of the actual purchase price paid that is attributable to the Software. Except as otherwise agreed by DLink in writing, the replacement Software is provided only to the original licensee, and is subject to the terms and conditions of the license granted by D-Link for the Software. Replacement Software will be warranted for the remainder of the original Warranty Period and is subject to the same limitations and exclusions. If a material non-conformance is incapable of correction, or if D-Link determines in its sole discretion that it is not practical to replace the non-conforming Software, the price paid by the original licensee for the non-conforming Software will be refunded by D-Link; provided that the non-conforming Software (and all copies thereof) is first returned to D-Link. The license granted respecting any Software for which a refund is given automatically terminates.

### **Non-Applicability of Warranty:**

The Limited Warranty provided hereunder for Hardware and Software portions of D-Link’s products will not be applied to and does not cover any refurbished product and any product purchased through the inventory clearance or liquidation sale or other sales in which D-Link, the sellers, or the liquidators expressly disclaim their warranty obligation pertaining to the product and in that case, the product is being sold “As-Is” without any warranty whatsoever including, without limitation, the Limited Warranty as described herein, notwithstanding anything stated herein to the contrary.

### **Submitting A Claim:**

The customer shall return the product to the original purchase point based on its return policy. In case the return policy period has expired and the product is within warranty, the customer shall submit a claim to D-Link as outlined below:

- The customer must submit with the product as part of the claim a written description of the Hardware defect or Software nonconformance in sufficient detail to allow DLink to confirm the same, along with proof of purchase of the product (such as a copy of the dated purchase invoice for the product) if the product is not registered.
- The customer must obtain a Case ID Number from D-Link Technical Support at 1-877-453-5465, who will attempt to assist the customer in resolving any suspected defects with the product. If the product is considered defective, the customer must obtain a Return Material Authorization (“RMA”) number by completing the RMA form and entering the assigned Case ID Number at <https://rma.dlink.com/>.

- After an RMA number is issued, the defective product must be packaged securely in the original or other suitable shipping package to ensure that it will not be damaged in transit, and the RMA number must be prominently marked on the outside of the package. Do not include any manuals or accessories in the shipping package. DLink will only replace the defective portion of the product and will not ship back any accessories.
- The customer is responsible for all in-bound shipping charges to D-Link. No Cash on Delivery (“COD”) is allowed. Products sent COD will either be rejected by D-Link or become the property of D-Link. Products shall be fully insured by the customer and shipped to D-Link Systems, Inc., 17595 Mt. Herrmann, Fountain Valley, CA 92708. D-Link will not be held responsible for any packages that are lost in transit to D-Link. The repaired or replaced packages will be shipped to the customer via UPS Ground or any common carrier selected by D-Link. Return shipping charges shall be prepaid by D-Link if you use an address in the United States, otherwise we will ship the product to you freight collect. Expedited shipping is available upon request and provided shipping charges are prepaid by the customer. D-Link may reject or return any product that is not packaged and shipped in strict compliance with the foregoing requirements, or for which an RMA number is not visible from the outside of the package. The product owner agrees to pay D-Link’s reasonable handling and return shipping charges for any product that is not packaged and shipped in accordance with the foregoing requirements, or that is determined by D-Link not to be defective or non-conforming.

### **What Is Not Covered:**

The Limited Warranty provided herein by D-Link does not cover:

Products that, in D-Link’s judgment, have been subjected to abuse, accident, alteration, modification, tampering, negligence, misuse, faulty installation, lack of reasonable care, repair or service in any way that is not contemplated in the documentation for the product, or if the model or serial number has been altered, tampered with, defaced or removed; Initial installation, installation and removal of the product for repair, and shipping costs; Operational adjustments covered in the operating manual for the product, and normal maintenance; Damage that occurs in shipment, due to act of God, failures due to power surge, and cosmetic damage; Any hardware, software, firmware or other products or services provided by anyone other than D-Link; and Products that have been purchased from inventory clearance or liquidation sales or other sales in which D-Link, the sellers, or the liquidators expressly disclaim their warranty obligation pertaining to the product.

While necessary maintenance or repairs on your Product can be performed by any company, we recommend that you use only an Authorized D-Link Service Office. Improper or incorrectly performed maintenance or repair voids this Limited Warranty.

### **Disclaimer of Other Warranties:**

EXCEPT FOR THE LIMITED WARRANTY SPECIFIED HEREIN, THE PRODUCT IS PROVIDED “AS-IS” WITHOUT ANY WARRANTY OF ANY KIND WHATSOEVER INCLUDING, WITHOUT LIMITATION, ANY WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT.

IF ANY IMPLIED WARRANTY CANNOT BE DISCLAIMED IN ANY TERRITORY WHERE A PRODUCT IS SOLD, THE DURATION OF SUCH IMPLIED WARRANTY SHALL BE LIMITED TO THE DURATION OF THE APPLICABLE WARRANTY PERIOD SET FORTH ABOVE. EXCEPT AS EXPRESSLY COVERED UNDER THE LIMITED WARRANTY PROVIDED HEREIN, THE ENTIRE RISK AS TO THE QUALITY, SELECTION AND PERFORMANCE OF THE PRODUCT IS WITH THE PURCHASER OF THE PRODUCT.

**Limitation of Liability:**

TO THE MAXIMUM EXTENT PERMITTED BY LAW, D-LINK IS NOT LIABLE UNDER ANY CONTRACT, NEGLIGENCE, STRICT LIABILITY OR OTHER LEGAL OR EQUITABLE THEORY FOR ANY LOSS OF USE OF THE PRODUCT, INCONVENIENCE OR DAMAGES OF ANY CHARACTER, WHETHER DIRECT, SPECIAL, INCIDENTAL OR CONSEQUENTIAL (INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF GOODWILL, LOSS OF REVENUE OR PROFIT, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, FAILURE OF OTHER EQUIPMENT OR COMPUTER PROGRAMS TO WHICH D-LINK'S PRODUCT IS CONNECTED WITH, LOSS OF INFORMATION OR DATA CONTAINED IN, STORED ON, OR INTEGRATED WITH ANY PRODUCT RETURNED TO D-LINK FOR WARRANTY SERVICE) RESULTING FROM THE USE OF THE PRODUCT, RELATING TO WARRANTY SERVICE, OR ARISING OUT OF ANY BREACH OF THIS LIMITED WARRANTY, EVEN IF D-LINK HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. THE SOLE REMEDY FOR A BREACH OF THE FOREGOING LIMITED WARRANTY IS REPAIR, REPLACEMENT OR REFUND OF THE DEFECTIVE OR NONCONFORMING PRODUCT. THE MAXIMUM LIABILITY OF D-LINK UNDER THIS WARRANTY IS LIMITED TO THE PURCHASE PRICE OF THE PRODUCT COVERED BY THE WARRANTY. THE FOREGOING EXPRESS WRITTEN WARRANTIES AND REMEDIES ARE EXCLUSIVE AND ARE IN LIEU OF ANY OTHER WARRANTIES OR REMEDIES, EXPRESS, IMPLIED OR STATUTORY.

**Governing Law:**

This Limited Warranty shall be governed by the laws of the State of California. Some states do not allow exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the foregoing limitations and exclusions may not apply. This Limited Warranty provides specific legal rights and you may also have other rights which vary from state to state.

**Trademarks:**

D-Link is a registered trademark of D-Link Systems, Inc. Other trademarks or registered trademarks are the property of their respective owners.

**Copyright Statement:**

No part of this publication or documentation accompanying this product may be reproduced in any form or by any means or used to make any derivative such as translation, transformation, or adaptation without permission from D-Link Corporation/D-Link Systems, Inc., as stipulated by the United States Copyright Act of 1976 and any amendments thereto. Contents are subject to change without prior notice.

**CE Mark Warning:**

This is a Class B product. In a domestic environment, this product may cause radio interference, in which case the user may be required to take adequate measures.

**FCC Statement:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communication. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

For detailed warranty information applicable to products purchased outside the United States, please contact the corresponding local D-Link office.
