PACKAGE CONTENTS

- **DWA-171 Wireless USB Adapter**

If any of these items are missing from your packaging, please contact your reseller.

INSTALLATION

1. Download the required driver on the DWA-171 description page from the www.dlink.com website.
2. Insert the DWA-171 into any available USB port of your powered on PC.
3. If the "Driver Software Installation" dialog box appears, press "Cancel" / "Close".
4. Open a folder with the required driver and run the "setup.exe" file to install the driver.

SETUP AND CONFIGURATION PROBLEMS

1. **What should I do, if I've forgotten my wireless encryption key?**
   The wireless encryption key is configured at the Wireless Access Point or Router. If you are unable to obtain your encryption key, the only solution would be to reconfigure your Access Point/Router to use a new encryption key. Please contact your Wireless Access Point/Router manufacturer.

2. **Why can't I get a wireless connection?**
   - Check that your DWA-171 is plugged in properly to the USB port or try to plug the DWA-171 into another USB port if it is available.
   - The LED on the DWA-171 should be lit, otherwise there could be a physical fault on the USB port or the driver is not installed properly.
   - Ensure that the wireless settings on the DWA-171 match the settings on your Access Point/Router. Please check and confirm your settings for **Wireless Network Name (SSID)**
     Wireless Encryption Key
     Wireless Security Method (e.g. WEP, WPA2)
     to check whether a Wireless connection has been made, in the Windows System Tray (bottom right).
   - Check that your Internet is working fine on existing computers.
   - Ensure that you have followed and completed the software installation process, otherwise, please reinstall the software. The LED on the DWA-171 should come on after software installation.
