

DSL-504 Technical Guide and Setup Examples

HQ Technical Support Department

RFC-1577 IPoA Configuration

1. There are three IP networks.
2. The IP address are statically assigned.
3. After reboot, DSL-504 can establish the connection automatically. No dial is needed.

RFC-1577 IPoA Configuration

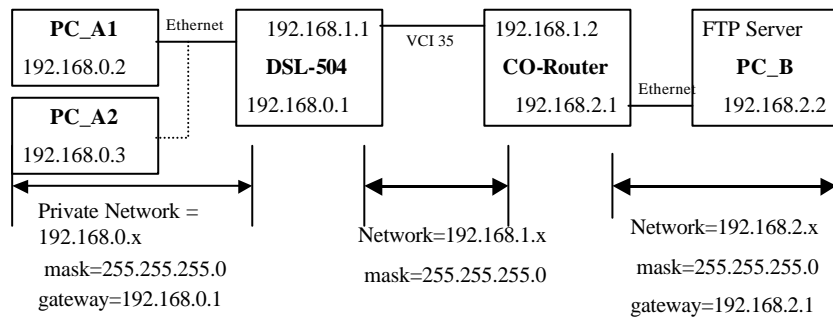

- Needs to use Console to configure

=== IPoA Client (DSL-504) ===

```
ip device add ethernet ether //edd 192.168.0.1
ip device add ipoa1 atm //bun 192.168.1.254
config save
restart

ip ipatm pvc add ipoa1 atm 0/39 remoteip 192.168.1.253
ip relay all
ip route add def 0.0.0.0 192.168.1.253 00:00:00:00 2
ip nat add ipoa1
config save
restart
```

RFC-1577 IPoA Configuration

Testing:

- PC_A can ping PC_B.
